Objectivity And Human Perception:

Objectivity and Human Perception M.D. Faber, 1985 In this radical examination of psychological and philosophical theories of perception M D Faber synthesizes significant aspects of both Treating such diverse subjects as mysticism economics epistemology politics and the rearing of children Faber links innovative psychoanalytic concepts to the mainstream of modern philosophical thought **T. S. Eliot: A Voice Descanting** Shyamal Bagchee, 1990-06-18 Using a variety of approaches from the traditional to the post modern this volume brings together essays by 14 scholars who examine T S Eliot s poetry and criticism These essays were written and edited on the occasion of Eliot s birth centenary The Culture of Language in Ming China Nathan Vedal, 2022-04-13 Winner 2023 Morris D Forkosch Prize Journal of the History of Ideas The scholarly culture of Ming dynasty China 1368 1644 is often seen as prioritizing philosophy over concrete textual study Nathan Vedal uncovers the preoccupation among Ming thinkers with specialized linguistic learning a field typically associated with the intellectual revolution of the eighteenth century He explores the collaboration of Confucian classicists and Buddhist monks opera librettists and cosmological theorists who joined forces in the pursuit of a universal theory of language Drawing on a wide range of overlooked scholarly texts literary commentaries and pedagogical materials Vedal examines how Ming scholars positioned the study of language within an interconnected nexus of learning He argues that for sixteenth and seventeenth century thinkers the boundaries among the worlds of classicism literature music cosmology and religion were far more fluid and porous than they became later In the eighteenth century Qing thinkers pared away these other fields from linguistic learning creating a discipline focused on corroborating the linguistic features of ancient texts Documenting a major transformation in knowledge production this book provides a framework for rethinking global early modern intellectual developments It offers a powerful alternative to the conventional understanding of late imperial Chinese intellectual history by focusing on the methods of scholarly practice and the boundaries by which contemporary thinkers defined their field of study **Marketing Theory** Shelby D. Hunt, One of the true classics in Marketing is now thoroughly revised and updated Marketing Theory is both evolutionary and revolutionary As in earlier editions Shelby Hunt focuses on the marketing discipline s multiple stakeholders He articulates a philosophy of science based tool kit for developing and analyzing theories law like generalizations and explanations in marketing science Hunt adds a new dimension to the book however by developing arguments for the position that Resource Advantage Theory provides the foundation for a general theory of marketing and a theoretical foundation for business and marketing strategy Also new to this edition are four chapters adapted and updated from Hunt s Controversy in Marketing Theory that analyze the philosophy debates within the field including controversies with respect to scientific realism qualitative methods truth and objectivity *Theology as Performance* Philip Stoltzfus, 2006-06-05 Theology as Performance breaks new ground in the growing conversation between modern theology and philosophical aesthetics Stoltzfus proposes that significant moments in the Western development of the

concept of God in particular as represented in the figures of Friedrich Schleiermacher Karl Barth and Ludwig Wittgenstein have been deeply influenced by concepts and approaches borrowed from the discipline of musical aesthetics Each thinker develops fundamentally different ways of writing about God that have in significant respects been derived from each one's reading and writing about music The aesthetic implications of Schleiermacher's so-called subjectivist turn Barth's objectivist reaction and Wittgenstein's language game pragmatism can thus be fully understood only by attending to the musical culture and distinctly musicological discourses that gave rise to them Stoltzfus constructs two trajectories of thought with which to trace theological reflection upon music throughout the pre-modern period the traditions of Orpheus and Pythagoras Schleiermacher's aesthetic approach then becomes a modern representative of the Orpheus trajectory and Barth's approach a representative of the Pythagoras trajectory Stoltzfus interprets Wittgenstein as putting forward a radical critique of these trajectories and pointing toward a third performative theological aesthetic method Theology as Performance offers a provocative rethinking of the aesthetic roots of modern theology
