Objectoriented And Mixed Programming Paradigms New Directions In Computer Graphics:

Object-Oriented and Mixed Programming Paradigms Peter Wisskirchen,2012-12-06 The area of computer graphics is characterized by rapid evolution New techniques in hardware and software developments e g new rendering methods have led to new ap plications and broader acceptance of graphics in fields such as scientific visualization multi media applications computer aided design and virtual reality systems The evolving functionality and the growing complexity of graphics algorithms and sys tems make it more difficult for the application programmer to take full advantage of these systems Conventional programming methods are no longer suited to manage the increasing complexity so new programming paradigms and system architectures are re quired One important step in this direction is the introduction and use of object oriented methods Intuition tells us that visible graphical entities are objects and experience has indeed shown that object oriented software techniques are quite useful for graphics The expressiveness of object oriented languages compared to pure procedurallanguages gives the graphics application programmer much better support when transforming his mental intentions into computer code Moreover object oriented software development is a weil founded technology allowing software to be built from reusable and extensible compo nents This book contains selected reviewed and thoroughly revised vers ions of papers submit ted to and presented at the Fourth Eurographics Workshops on Object Oriented Graphics held on May 9 11 1994 in Sintra Portugal

Parallel Computing: Fundamentals, Applications and New Directions E.H. D'Hollander,G.R. Joubert,Frans Peters,Ulrich Trottenberg,1998-07-22 This volume gives an overview of the state of the art with respect to the development of all types of parallel computers and their application to a wide range of problem areas The international conference on parallel computing ParCo97 Parallel Computing 97 was held in Bonn Germany from 19 to 22 September 1997 The first conference in this biannual series was held in 1983 in Berlin Further conferences were held in Leiden The Netherlands London UK Grenoble France and Gent Belgium From the outset the aim with the ParCo Parallel Computing conferences was to promote the application of parallel computers to solve real life problems In the case of ParCo97 a new milestone was reached in that more than half of the papers and posters presented were concerned with application aspects This fact reflects the coming of age of parallel computing Some 200 papers were submitted to the Program Committee by authors from all over the world The final programme consisted of four invited papers 71 contributed scientific industrial papers and 45 posters In addition a panel discussion on Parallel Computing and the Evolution of Cyberspace was held During and after the conference all final contributions were refereed Only those papers and posters accepted during this final screening process are included in this volume The practical emphasis of the conference was accentuated by an industrial exhibition where companies demonstrated the newest developments in parallel processing equipment and software Speakers from participating companies presented papers in industrial sessions in which new developments in parallel computing were reported
