## **Objects Attention:**

*Objects and Attention* Brian J. Scholl,2002 An overview of object based models of attention     *Attention* Addie Johnson,Robert W. Proctor,2004 Attention Theory and Practice provides a balance between a readable overview of attention and an emphasis on how theories and paradigms for the study of attention have developed The book highlights the important issues and major findings while giving sufficient details of experimental studies models and theories so that results and conclusions are easy to follow and evaluate Rather than brushing over tricky technical details the authors explain them clearly giving readers the benefit of understanding the motivation for and techniques of the experiments in order to allow readers to think through results models and theories for themselves Attention is an accessible text for advanced undergraduate and graduate students in psychology as well as an important resource for researchers and practitioners interested in gaining an overview of the field of attention

*Vision and Attention* Michael Jenkin,Laurence Harris,2001-05-18 CD ROM contains Color images and video clips     Fundamentals of AAC Nerissa Hall,Jenifer Juengling-Sudkamp,Michelle L. Gutmann,Ellen R. Cohn,2025-10-15 The second edition of Fundamentals of AAC A Case Based Approach to Enhancing Communication continues to be a course friendly textbook designed to walk readers through the theoretical and clinical underpinnings of assessment intervention and consultation for individuals with complex communication needs across the lifespan Augmentative and alternative communication AAC encompasses a variety of communication methods and is used by those with a wide range of speech and language impairments With a consistent framework and descriptive case studies as well as input from various stakeholders readers can gain a comprehensive understanding of the needs of persons who use AAC and how to provide them with ethically and culturally considerate support Unlike other texts on this topic this book empowers readers to visualize AAC in action Each chapter begins with fundamental concepts and principles followed by a relevant case study that presents the concepts and principles in action that guide the reader through the use of clinical decision making in AAC Every case study is designed to underscore the cultural linguistic and social variability inherent to the fields of AAC and communication sciences and how each individual influences the manifestation of the AAC system treatment and implementation plans Intended to easily translate into a 6 8 or 13 week semester course this textbook is divided into eight distinct sections Section I provides an overview of AAC no tech mid tech and high tech AAC systems as well as mobile technology and advancing technology Section II discusses language fundamentals Section III reviews AAC assessment intervention and implementation for toddlers preschoolers and school aged individuals along with goal writing and data collection Section IV covers assessment intervention and implementation for young adults and adults needing AAC Section V offers the reader detailed information and rich examples of the application of AAC for persons with developmental disabilities Section VI provides the theoretical foundation and exemplar case studies of AAC for persons with acquired disabilities Section VII details consultation and training for various stakeholders as well as

tele AAC services Section VIII presents a collection of essays from various stakeholders New to the Second Edition A chapter dedicated to AAC and literacy Updated information about neuro affirming practice technology advancements like artificial intelligence and automation and implementation of AAC outside of intervention New photos and videos Updated intervention resources Report writing tools Enhanced instructor resources Key Features Overviews with key terms set the stage for each section 36 case studies with questions and visuals to clearly depict each case Boxes with practical tips and expert advice

Principles of Cognition Eduardo Mercado III,2024-08-20 A comprehensive overview of what psychologists now know about the nature of cognition Principles of Cognition provides students with an invaluable introduction to the modern science of cognition blending invaluable insights from behavioral and neuroscientific studies of humans and other animals with unique examples cutting edge research summaries and real world applications This accessible textbook builds on the legacy of psychologist William James by emphasizing not only the form cognition takes in laboratory research but also the functional dynamics of cognitive processes in everyday life and the ways they vary across individuals and species Using an integrative approach that highlights the relevance of cognition across psychological disciplines it engages students by showing how cognition emerges over time how cognitive abilities can be improved and how thinking can be upended by something as simple as falling in love Discusses topics in cognition rarely covered by other textbooks including perception of time and space consciousness animal cognition mathematical and reading skills emotions intelligence generalization and social cognition Emphasizes learning and its interactions with memory and cognition Features practical applications from cognitive research in every chapter Connects topics across chapters to promote retention and critical thinking Draws on the latest experimental naturalistic and applied research Integrates findings about animals and children with traditional studies of adults to develop a more neurally grounded framework for thinking about the mechanisms of cognition An ideal textbook for undergraduate and graduate classrooms

**Findings and Current Opinion in Cognitive Neuroscience** Larry R. Squire,Stephen Michael Kosslyn,1998 This volume which contains forty six review articles from recent issues of Current Opinion in Neurobiology provides easy access to the current state of theory and findings in the field Attention and consciousness in different senses Naotsugu Tsuchiya,Jeroen J. Van Boxtel,2013-06-03 Although often used in everyday speech and in the scholarly literature selective attention and consciousness lack clear undisputed definitions Partly because of this deficit there exists a lively debate on the relationship between the two Nevertheless attention has been studied scientifically for a long time because a variety of tasks allow researchers to control several of its aspects e g focused and feature based attention Consciousness as a scientific subject of study has emerged more recently but is now rapidly gaining traction Scientific studies of consciousness concern the state or level of consciousness e g awake as opposed to in coma dreamless sleep or under anaesthesia as well as the contents of consciousness or the phenomenology of perception With the increase in consciousness focused research there is a concomitant surge in research examining the relationship between attention and

consciousness This relationship between attention and consciousness is the topic of this Research Topic Contributions related to or focused solely on attention or on consciousness will not be considered It had long been assumed that attention and consciousness are inextricably intertwined two sides of the same coin However recently substantial evidence has emerged that attention and consciousness are interacting but separable processes It is however debated how tight the interactions are and what the exact nature of the relationship is Therefore we invite researchers from different camps to provide opinionated but balanced literature reviews Different groups will interpret the same data in different ways We feel that combining these views in one Research Topic is immensely valuable to researchers from different fields Apart from reviews we also invite potential contributors to provide new and exciting evidence in the form of original contributions that may support any of the different views Even though attention and consciousness are critical aspects of many different cognitive processes they are mainly studied though not exclusively in the domain of visual perception In other sensory modalities e g olfaction or audition it is currently not clear whether distinctions between attention and consciousness exist which is even more true for other cognitive processes such as memory Therefore we specifically invite contributions covering the auditory somatosensory olfactory and memory domain We ask all contributors to provide discussions on the relationship between attention and consciousness and focus on 1 the influence of attention on sensory processing 2 the formation of conscious perception 3 the evidence for unconscious processing and its modulation by attention 4 potential indications for dissociations between attention and consciousness e g does paying attention to a stimulus decrease performance on e g a discrimination task 5 neuroimaging and neurophysiology data pertaining to these questions Often one is caught in one's own research field and lacks the time or the knowledge to delve into another field This Research Topic should provide a great overview in great breadth of the current state of knowledge on the links between attention and consciousness and their interactions in several different sensory modalities

Proceedings of the European Cognitive Science Conference 2007  
Stella Vosniadou, 2017-09-29 This volume contains the invited lectures invited symposia symposia papers and posters presented at the 2nd European Cognitive Science Conference held in Greece in May 2007 The papers presented in this volume range from empirical psychological studies and computational models to philosophical arguments meta analyses and even to neuroscientific experimentation The quality of the work shows that the Cognitive Science Society in Europe is an exciting and vibrant one There are 210 contributions by cognitive scientists from 27 different countries including USA France UK Germany Greece Italy Belgium Japan Spain the Netherlands and Australia This book will be of interest to anyone concerned with current research in Cognitive Science
