Oceans Jump Ecology:

A Leap to an Ecological Economy Derek Paul, 2017-12-04 Is the present economy working for you and those around you Is your government in debt In your country is there a real drive to deal with climate change Are you aware of the great urgency of doing this Are you aware that many economists consider that one cannot address climate change and other urgent problems within the economic system we now have If it seems to you that the world has come to an impasse theres a solution in the form of a new kind of economic thinking with many practical changes to match Its called an ecological economy EE It calls us to put the health of all life on this planet as the central issue The EE will focus on resources rather than only money Money will no longer rule us rather it will help us do what needs doing And well measure capital in natural units not money Therell be employment for those who want it and the extra jobs will be found in projects that will be directed at the health of the ecosphere and that includes your health The fields and forests that have been denuded of nutrients will over time be restored carbon dioxide emissions from fossil fuels will be eliminated The costs of such projects will be assessed in terms of resource requirements and the needed human effort with money as the servant not the boss The nations will learn to cooperate better it will be in all of their interests The worlds burgeoning population will halt its expansion just in time to give wild life the breathing space it needs

Emotional and Ecological Literacy for a More Sustainable Society Giuliana Panieri, Margherita Paola Poto, Emily Margaret Murray, 2024-05-22 This open access book aims to promote ecological and emotional research and education for sustainability by cultivating values and behaviours consistent with how nature makes us feel connected and nurtured Built upon the intersection of ecological literacy and socio emotional learning grounded in sustainability and relational thinking the research developed in the book covers a wide range of themes connected to the Agenda 2030

Indian Ocean Biogeochemical Processes and Ecological Variability Jerry D. Wiggert, Raleigh R. Hood, S. Wajih A. Naqvi, Kenneth H. Brink, Sharon L. Smith, 2013-05-09 Published by the American Geophysical Union as part of the Geophysical Monograph Series Volume 185 Indian Ocean Biogeochemical Processes and Ecological Variability provides a synthesis of current knowledge on Indian Ocean biogeochemistry and ecology and an introduction to new concepts and topical paradigm challenges It also reports on the development of more extensive frequent observational capacity being deployed in the Indian Ocean This represents the first collection of syntheses that emphasize a basin wide perspective and the contributing authors include some of the most esteemed oceanographers and Indian Ocean experts in the world The volume is derived from invited plenary talks that were presented at the initial Sustained Indian Ocean Biogeochemistry and Ecosystem Research SIBER workshop held at the National Institute of Oceanography NIO in Goa India in October 2006 The volume discusses The overlying physical processes set by monsoonal forcing and how these control biological production and variability Nutrient cycling and limitation Pelagic carbon cycling and air sea exchange Benthic biogeochemistry and ecology The impact of climate and human activities on biogeochemistry and ecosystems The readership

for this book will consist of academic and governmental researchers interested in exploring how oceanographic atmospheric and hydrological processes combine to establish the environmental setting that supports and drives the pelagic system and which are especially relevant to understanding the complex biogeochemical and ecological interactions in the Indian Ocean
