Michael F. Drummond,2015 9 2 The role of decision analytic models for economic evaluation Methods for the Economic Evaluation of Health Care Programmes M. F. Drummond,B. O'Brien,G. L. Stoddart,1997 *Methods for the Economic Evaluation of Health Care Programmes* ,1997 *Theory and Methods of Economic Evaluation of Health Care*

Magnus Johannesson,1996-05-31 Most economic evaluations of health care programmes at the moment are cost effectiveness and cost utility analyses The problem with these methods is that their theoretical foundations are unclear This has led to confusion about how to define the costs and health effects and how to interpret the results of these studies In the

environmental and traffic safety fields it is instead common to carry out traditional cost benefit analyses of health improving programmes. This striking difference in how health programmes are assessed in different fields was the original motivation for writing this book. The aim of the book is to unify and provide a coherent framework within cost benefit analysis and welfare economics for the different methods of economic evaluation in the health care field. The book is written in an easily accessible manner and several examples of applications of the different methods are provided. It is my hope that it will be useful both for teaching purposes and as a guide for practitioners in the field. Glenn C. Blomquist, John D. Graham, Rich O. Conor and four anonymous referees provided helpful comments on previous versions of the manuscript. I would also like to express my gratitude to the following persons for helping me to prepare the manuscript: Carl Magnus Berglund, Carin Blanksvård, Ann Brown and Ziad Obeid.
