**Impressionist and Post-impressionist Paintings in the Metropolitan Museum of Art** Metropolitan Museum of Art (New York, N.Y.) Charles S. Moffett, 1985     **A Global History of Pre-Modern Warfare** Kaushik Roy, 2021-09-14 This book examines the military histories of the regions beyond Western Europe in the pre modern era Existing works on global military history mainly focus on the western part of Eurasia after 1500 CE As regards the ancient period such works concentrate exclusively on Greece and Rome So global military history is actually the triumphal story of the West from Classical Greece onwards This volume focuses not only on the eastern part of Eurasia but also on South America Africa and Australasia and seeks to explain the history and varied trajectories of warfare in non Western regions in the pre modern era Further it evaluates whether warfare in non Western regions should be considered primitive or inferior when compared with Western warfare The book notes that Western Europe became militarily significant only in the early modern era and argues that the military divergence that occurred during the early modern era is not unique it had also occurred in the Bronze Age the Classical era and in the medieval period This was due to the dynamism and innovativeness of non Western militaries and the interconnectedness that existed in parts of the Eurasian landmass Further those polities which were able to construct a balanced military force by synthesising diverse elements were not only able to survive but also became capable of projecting power across continents This book will be of much interest to students of military history strategic studies and world history

**Painting as an Art** Richard Wollheim, 2023-10-17 One of the twentieth century's most influential texts on philosophical aesthetics Painting as an Art is acclaimed philosopher Richard Wollheim's encompassing vision of how to view art Transcending the traditional boundaries of art history Wollheim draws on his three great passions philosophy psychology and art to present an illuminating theory of the very experience of art He shows how to unlock the meaning of a painting by retrieving almost reenacting the creative activity that produced it In order to fully appreciate a work of art Wollheim argues critics must bring a much richer conception of human psychology than they have in the past This classic book points the way to discovering what is most profound and subtle about paintings by major artists such as Titian Bellini and de Kooning

Dean,2025-09-23 Illuminating the abstract art of the Inka what it conveys about Inka values and its relationship to those who view it Inka visual culture is unusual in its tendency toward abstraction Public stonework vessels used at state feasts garments worn by the imperial elite these objects announcing status and power are adorned with geometric designs that refuse figuration After searching in vain for hidden referents many scholars have largely given up the search for meaning Inside Abstraction develops a novel interpretation Eminent art historian Carolyn Dean proposes that Inka geometries are neither ornamental nor coded depictions of other objects Rather Dean shows that in the Andean world the designs were functionally self aware possessing perspectives of their own quite literally looking back at and addressing viewers directly Further Dean contends that these agent abstractions were teachers conveying particular messages concerning social hierarchy the relations among geometries and colors instructed viewers as to their own proper social relations Inka designs thereby served imperial aims by wordlessly communicating the state's values and demands for submission Extensively illustrated and rigorously argued Inside Abstraction is a dramatic step forward in our understanding of Inka art and political order    ABM ,1976 Abstracts of journal articles books essays exhibition catalogs dissertations and exhibition reviews The scope of ARTbibliographies Modern extends from artists and movements beginning with Impressionism in the late 19th century up to the most recent works and trends in the late 20th century Photography is covered from its invention in 1839 to the present A particular emphasis is placed upon adding new and lesser known artists and on the coverage of foreign language literature Approximately 13 000 new entries are added each year Published with title LOMA from 1969 1971
