Natural History and Ecology of Mexico and Central America Levente Hufnagel, 2021-08-18 Natural History and Ecology of Mexico and Central America presents an interesting overview of the frontiers of biodiversity and ecological research in the geographical area of Mexico and Central America Chapters cover such topics as biodiversity and ecology of plant communities tropical subterranean ecosystems floating Sargassum species the endangered species *Dioon edule* Kemp's ridley sea turtles fish and fisheries urbanization and bats and food and sustainable diet *Echinoderm Research and Diversity in Latin America* Juan José Alvarado, Francisco Alonso Solis-Marin, 2012-08-07 This book compiles for the first time the development of echinoderm research in Latin America The book contains 17 chapters one introductory 15 country chapters and a final biogeographic analysis It compiles all the investigations published in international and local journals reports theses and other gray literature Each chapter is composed of 7 sections introduction describes the marine environments and main oceanographic characteristics followed by a history of research account divided by specific subjects The next section addresses patterns of distribution and diversity A specific section would explain fishery or aquaculture activities The next sections deal with environmental and anthropogenic threats that are affecting echinoderm and any conservation or management action Finally a section with conclusions needs and new lines of research The book will include two appendixes with species lists of all echinoderms with bathymetric data habitat and distribution *Sun & Sea Tourism* Linda M. Ambrosie, 2015-09-10 Cruise ship passengers and all inclusive hotel guests are increasing exponentially as these floating and fixed properties proliferate in size and number This is especially true for developing economies that consider sun sand and sea tourism as a form of growth Tightly integrated multi billion dollar global enterprises mix with weak local institutions populated by local officials some corrupt vying for more investment to create a toxic cocktail with diminished social benefits as the hangover Within view of the shoreline and the towering monoliths of hotels and ships post secondary education facilities teach normative concepts of good management to students who upon graduation fight for a decreasing number of poorly paid jobs Meanwhile local government officials tout vacuous GDP figures and hospitality companies make inflated claims of employment to garner federal funding for infrastructure expansion Many observers have made similar claims that have been easily ignored to date due to an absence of studies integrating tax revenue private and public finance and social outcomes This combination illustrates not only current structures but also how they are engendered Rather than relying on tourist satisfaction much investment is driven by windfall profits and tax loss carryforwards thanks to tax loopholes and willing local officials that ignore or aid in the violation of regulations While foreign companies condemn the corruption and cronyism at destinations local nationals decry the exploitative foreign companies The simple truth is that they flourish symbiotically As such this book necessarily addresses both actors However rather than being simply critical or numerical this book provides recommendations for multinational enterprises increasingly running the risk of detection of

aggressive tax planning and greenwashing For host countries it provides recommendations of a virtuous cycle for improved public sector accountability to restore the beneficial effects of tourism There is also a discussion on how a value added study of the tourism industry within a jurisdiction could detect untaxed profits that are withheld through astute transfer pricing schemes This is a book for tourism managers and experts as well as policy makers in the Caribbean and any sun sand and sea destination that attracts floating and fixed all inclusives *Climate Change and Human Security* Michael R. Redclift, David Manuel Navarrete, Mark Pelling, 2011 The challenge presented by climate change is by its nature global The populations of the Mexican Caribbean the focus of this book are faced by everyday decisions not unlike those in the urban North The difference is that for the people of the Mexican Caribbean evidence of the effects of climate change including hurricanes is very familiar to them This important study documents the choices and risks of people who are powerless to change the economic development model which is itself forcing climate change The book examines the Mexican Caribbean coast and explores the wider issues of managing climate change in vulnerable areas of the tropics It also points to the inability to integrate development thinking into climate change adaptation The authors suggest that failures in local governance the transparency of state actions and the local populations lack of effective power represents a greater threat to adaptation than the absence of technical capacity in vulnerable areas Using local case studies of communities fishing villages and tourist destinations this well researched book will appeal to international students and academics working on climate change and professionals in development conservation and tourism industries **Mexican Caribbean** ,2000* *World Seas: An Environmental Evaluation* Jean-Francois Hamel, 2018-08-24 *World Seas An Environmental Evaluation* Second Edition Volume One Europe The Americas and West Africa provides a comprehensive review of the environmental condition of the seas of Europe the Americas and West Africa Each chapter is written by experts in the field who provide historical overviews in environmental terms current environmental status major problems arising from human use informed comments on major trends problems and successes and recommendations for the future The book is an invaluable worldwide reference source for students and researchers who are concerned with marine environmental science fisheries oceanography and engineering and coastal zone development Covers regional issues that help countries find solutions to environmental decline that may have already developed elsewhere Provides scientific reviews of regional issues thus empowering managers and policymakers to make progress in under resourced countries and regions Includes comprehensive maps and updated statistics in each region covered The Mexican Problem: Self-help Or Intervention Isaac Joslin Cox, 1921 **The Mexican Review** George F.
