Model Systems in Signal Transduction Shirish Shenolikar, Angus C. Nairn, 1993 **Biological Effects of Magnetic and Electromagnetic Fields** S. Ueno, 2007-07-23 The International Symposium on Biological Effects of Magnetic and Electromagnetic Fields was held from September 3-4 1993 at Kyushu University in Fukuoka Japan Originally it was only intended to be an informal gathering of many scientists who had accepted my invitation to visit Kyushu University after the XXIVth General Assembly of the International Union of Radio Science URSI held in Kyoto prior to our symposium However since so many distinguished scientists were able to come it was decided that a more formal symposium would be possible It was a very productive symposium and as a result many of the guests consented that it would be a good idea to gather all the information put forth at the meeting and have it published In addition although they were unfortunately unable to attend the symposium many other distinguished scientists had also expressed their wish to contribute to this effort and in so doing help to increase understanding in this as yet relatively immature field of science The question of both positive and negative effects of magnetic and electromagnetic fields on biological systems has become more and more important in our world today as they Sourcebook of Models for Biomedical Research P. Liburdy, Bertil Persson, 1992 This volume presents the proceedings of a New York Academy of Sciences conference held in May 1991 It represents an up to date assessment of the biological effects and safety hazards associated with magnetic resonance imaging MRI and spectroscopy The interaction of electric and magnetic fields present within the surrounding MRI systems with cells organs and whole animals is carefully analysed Experts in medicine medical physics and bioelectromagnetics provide a review of the hazards known to occur in existing MRI systems and a framework for the study of new problems that may emerge with the development of advanced MRI systems **Current Topics in Plant Biochemistry, Physiology and Molecular Biology** University of Missouri--Columbia Interdisciplinary Plant Group.
