Modeling Human Error in Structural Design and Construction Andrzej S. Nowak, 1986 Modeling Human Errors in Structural Design and Construction Andrzej S. Nowak, University of Michigan. Department of Civil Engineering, 1986*

Probabilistic Structural Mechanics Handbook C.R. Sundararajan, 2012-12-06 The need for a comprehensive book on probabilistic structural mechanics that brings together the many analytical and computational methods developed over the years and their applications in a wide spectrum of industries from residential buildings to nuclear power plants from bridges to pressure vessels from steel structures to ceramic structures became evident from the many discussions the editor had with practising engineers researchers and professors Because no single individual has the expertise to write a book with such a diverse scope a group of 39 authors from universities research laboratories and industries from six countries in three continents was invited to write 30 chapters covering the various aspects of probabilistic structural mechanics The editor and the authors believe that this handbook will serve as a reference text to practicing engineers teachers students and researchers It may also be used as a textbook for graduate level courses in probabilistic structural mechanics The editor wishes to thank the chapter authors for their contributions This handbook would not have been a reality without their collaboration
