Modelling Welfare State Reform:

Modelling Welfare State Reform G.M.M. Gelauff,J.J. Graafland,2014-06-28 In order to analyze the economic effects of various policy proposals for reforming the welfare state a model has been developed called MIMIC The structure of this model is presented in the first part of this book The model combines various modern labour market theories with a detailed description of relevant labour market institutions in an applied general equilibrium context The second part of the volume contains an elaborate presentation of the simulation results of MIMIC such as various tax policies a reduction in benefits or the official minimum wage individualization of the tax and social security system and the introduction of negative income tax The model has proved to be a unique instrument for policy evaluation for the Netherlands **Social Policy Review 36**

Bozena Sojka,Stephan Köppe,Andrea Parma,Ruggero Cefalo,2024-06-28 Available Open Access digitally under CC BY NC ND licence Experts from across the globe review leading social policy scholarship in this new volume in the Social Policy Review series Specialists explore local and multi level trends in social policy including government responses to the cost of living crisis in the UK and decentralisation in primary health care in Thailand They also review policy responses to working age risks in England Italy and Australia as well as policy developments and transformations such as social protection in Japan and Australia and immigration resettlement schemes in the UK Published in association with the Social Policy Association the latest book in this respected series will be essential reading for students and academics in social policy social welfare and related disciplines Changing Models of Capitalism in Europe and the U.S. Richard Deeg,Gregory Jackson,2016-04-14 The

volume analyzes the long term trajectories of change in the capitalist models of the UK Germany Sweden France Italy Hungary Slovakia and the United States The case studies identify critical junctures and key periods of change in order to show how institutions are shaped by different sets of socio political compromises and public policy The case studies follow a common methodology comparing change and linkages across six core institutional domains thus facilitating a comparative understanding of the patterns and drivers of institutional change as well as how liberalisation impacts countries in similar and dissimilar ways The historical perspective of the cases highlights the transformative effects of relatively slow and incremental changes These case studies also make an innovative contribution to examining the linkages between four levels of institutions that regulate the economy the international macro national meso and micro The volume reveals both a common trend toward more liberal forms of capitalism but also variations on this overarching trajectory Markets themselves create their own dynamics which have varied effects on firms and other economic actors in historically diverse institutional contexts This book was originally published as a special issue of the Journal of European Public Policy Reinventing the Welfare State Ruud A. de Mooij,2006 The Dutch welfare state is under pressure Future trends of ageing and globalisation render public finances unsustainable and worsen the position of low skilled workers on the labour market At the same time welfare state institutions seem insufficiently adapted to changed socio cultural circumstances Moreover they cause inactivity

among elderly workers women and social benefit recipients To prepare for the future the Dutch government aims to raise labour supply and improve human capital This study explores how welfare state reform can contribute to these goals Thereby we take into account the key social and economic functions that the welfare state fulfils in our society We analyse a number of reforms in Dutch institutions from a broad welfare perspective and quantify their effects on the labour market and the income distribution The study also develops three comprehensive prototype welfare state reforms for the Netherlands in the future We explore how robust these different prototypes are for immigration economic integration and technological change

The Making and Circulation of Nordic Models, Ideas and Images Haldor Byrkjeflot, Lars Mjøset, Mads Mordhorst, Klaus Petersen, 2021-10-19 This critical and empirically based volume examines the multiple existing Nordic models providing analytically innovative attention to the multitude of circulating ideas images and experiences referred to as Nordic It addresses related paradoxes as well as patterns of circulation claims about the exceptionality of Nordic models and the diffusion and impact of Nordic experiences and ideas Providing original case studies the book further examines how the Nordic models have been constructed transformed and circulated in time and in space It investigates the actors and channels that have been involved in circulating models journalists and media bureaucrats and policy makers international organizations national politicians and institutions scholars public diplomats and analyses where and why models have travelled Finally the book shows that Nordic models perspectives or ideas do not always originate in the Nordic region nor do they always develop as deliberate efforts to promote Nordic interests This book will be of key interest to Nordic and Scandinavian studies European studies and more broadly to history sociology political science marketing social policy organizational theory and public management The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **Pension**

Policies and Public Debt in Dynamic CGE Models Dirk Broer, Jukka Lassila, 1997 Papers on pension systems taxation and public debt in computable general equilibrium models *Progressivism and the World of Reform* Peter J. Coleman, 1987 In this major reinterpretation of the Progressive era Peter Coleman argues that the American welfare state had its origins in what he calls the world wide crisis of capitalism Here and abroad reformers no longer content to treat the symptoms of distress sought to achieve social political and economic justice by abandoning laissez faire in favor of governmental intervention This study thoroughly documents the external forces that shaped the American Progressive movement and shows that the reformers agenda for change drew heavily on foreign ideas and models as well as the American reform tradition Tracing the international cross currents of reform ideas Coleman demonstrates that for nearly three decades American reformers of every stripe regarded the Australasian colonies especially New Zealand as examples of what the United States could become Thus inspired American reformers worked for such goals as wage and hour legislation for women abolition of child labor workmen s compensation laws compulsory arbitration of labor disputes land reform cheap

loans for farmers old age pensions and infant and maternal care programs Through these and other measures that touched all aspects of the nation s life the role of government was enlarged By placing progressivism within an international context Coleman deepens our understanding of a phenomenon previously seen as distinctively American thereby clarifying both the substance and process of change in this country He also argues that in the Progressive era can be seen the origins of the regulations and mixed economy of the modern welfare state *Journal of Policy Modeling*, 1996

Models of Motherhood Arnlaug Leira, 1989 **Post-Soviet Affairs**, 2004 *Models and Methods for Economic Policy* Henk Don, Johan Peter Verbruggen, 2006 *Economic Science and Practice* Peter A. G. van Bergeijk, 1997 Economic Science and Practice seeks to bridge the gulf between economic theory and policy and overcome some of the problems created by the specialized nature of much economic research A distinguished group of academic economists and experienced policymakers from both Europe and the United States sheds new light on the relation between theory and practice and reflects on the current state of economics There is an ever present danger that modern economic theory is becoming too detached from the real world In contrast to this concern there are those who argue that there is a risk of practitioners and policymakers relying on pre scientific ideas or ideologies not tested against the latest scientific insights This book will not only help to improve communication between scientists and policymakers but will also show how it is possible to strengthen the scientific base of economic policy and improve the social relevance of economic research and education **OECD Economic Surveys** Organisation for Economic Co-operation and Development, 1999 *Analyzing Fiscal Policy in the Netherlands* J. J. Graafland, 1998 **CPB Report**, 1999 **The Social Welfare Forum** National Conference on Social Welfare, 1886

Vouchers for the Long-term Unemployed Egbert L. W. Jongen, J. J. Graafland, 1998 **Institutions at Work** C. den Broeder, 1996 **Models of Capitalism** Evelyne Huber, 2002 The volume is innovative in explicitly connecting the discussion of growth policies with an analysis of labour market and social policies and in going beyond comparison of Latin American with East Asian approaches to include reference to equity oriented policies in North America and Western Europe as well This approach helps demonstrate how important policy design is in determining distributive outcomes at any given level of development *Challenging Neighbours* CPB Netherlands Bureau for Economic Policy Analysis, 1997-08-20

Challenging Neighbours provides wide coverage of the German and Dutch economies from an institutional point of view Pensions competition policy labour relations corporate governance and health care are among the topics for which the institutional setting and performance of Germany and the Netherlands are compared The difficulties and successes the countries have in facing pressures from aging population developments in technology and global competition are traced back to their institutional roots and lead to mutual lessons for institutional reform for German and Dutch policy makers
