New Models in Geography Richard Peet,1989 **Economic Models for Policy Making** Solomon Cohen,2013-05-02 Over the past decades many different kinds of models have been developed that have been of use to policy makers but until now the different approaches have not been brought together with a view to enhancing the systematic unification and evaluation of these models This new volume aims to fill this gap by bringing together four decades worth of work by S I Cohen on economic modelling for policy making Work on older models has been rewritten and brought fully up to date and these older models have therefore been brought back to the fore both to assess how they influenced more recent models and to see how they could be used today The focus of the book is on models for development policies in developing economies but there are some chapters that relate to economic policies in transition and developed economies The policy areas covered are of typical interest in developing and transition economies They include those relating to trade liberalization reforms sustainable development industrial development agrarian reform growth and distribution human resource development and education public goods and income transfers Each chapter contains a brief assessment of the empirical literature on the economic effects of the policy measures discussed in the chapter The book presents a platform of economic modelling that can serve as a refresher for practising professionals as well as a reference companion for graduates engaging in economic modelling and policy preparations

Political Economy in Macroeconomics Allan Drazen,2000-01 Allan Drazen focuses on the implications of political and economic outcomes rather than political and public choice per se limiting his coverage to macroeconomics **New Models in Geography - Vol 2** Richard Peet,Nigel Thrift,2017-02-07 First published in 1989 Routledge is an imprint of Taylor Francis an informa company *Models of Imperfect Information in Politics* R. Politics in the Dutch Economy Bart Snels,2018-12-20 First published in 1999 this volume surveys economic theories of

political mechanisms as well as political theories of the influence of the institutional context in which decisions about social economic policies are being made In the first half of the seventeenth century the Dutch Republic emerged as one of Europe s leading maritime powers The political and military leadership of this small country was based on large scale borrowing from an increasingly wealthy middle class of merchants manufacturers and regents This volume presents the first comprehensive account of the political economy of the Dutch republic from the sixteenth to the early nineteenth century Building on earlier scholarship and extensive new evidence it tackles two main issues the effect of political revolution on property rights and public finance and the ability of the nation to renegotiate issues of taxation and government borrowing in changing political circumstances

Alternative Political Economy Models of Transition John

Marangos, 2017-07-05 The collapse of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition
