DANCE AND  
AMERICAN MODERNISM  
FROM MARTHA GRAHAM  
TO ALVIN AILEY

*Julia L. Foulkes*

# Modern Bodies

**Sir William Osler**

## **Modern Bodies:**

**Modern Bodies** Julia L. Foulkes,2003-11-03 In 1930 dancer and choreographer Martha Graham proclaimed the arrival of dance as an art of and from America Dancers such as Doris Humphrey Ted Shawn Katherine Dunham and Helen Tamiris joined Graham in creating a new form of dance and like other modernists they experimented with and argued over their aesthetic innovations to which they assigned great meaning Their innovations however went beyond aesthetics While modern dancers devised new ways of moving bodies in accordance with many modernist principles their artistry was indelibly shaped by their place in society Modern dance was distinct from other artistic genres in terms of the people it attracted white women many of whom were Jewish gay men and African American men and women Women held leading roles in the development of modern dance on stage and off gay men recast the effeminacy often associated with dance into a hardened

heroic American athleticism and African Americans contributed elements of social African and Caribbean dance even as their undervalued role defined the limits of modern dancers communal visions Through their art modern dancers challenged conventional roles and images of gender sexuality race class and regionalism with a view of American democracy that was confrontational and participatory authorial and populist *Modern Bodies* exposes the social dynamics that shaped American modernism and moved modern dance to the edges of society a place both provocative and perilous *Jews in the Early Modern English Imagination* Eva Johanna Holmberg,2011 Jews in the Early Modern English Imagination explores how for English travellers the Jew of the imagination contrasted with the Jew they actually encountered in southern Europe North Africa and the Levant Based on travel writings religious history and popular literature this cultural historical study sheds new light not only on English representations of Jews during the period but more generally on constructions of early modern religious and ethnic identities

*Re-Forming the Body* MR Philip A Mellor,Philip A. Mellor Chris Shilling,Professor Chris Shilling,1997-02-14 Enriches the conceptual arsenal for interdisciplinary analysis of political social and cultural change stimulates more nuanced thinking about the cultural and political legacy of the Reformation era manages both to clarify tensions surrounding cultural and social integration in the late 20th century while underscoring the real historical complexity of modern bodies American Journal of Sociology Through an analysis of successive re formations of the body this innovative and penetrating book constructs a fascinating and wide ranging account of how the creation and evolution of different patterns of human community are intimately related to the somatic experience of the sacred The book places the relationship between the embodiment and the sacred at the crux of social theory and casts a fresh light on the emergence and transformation of modernity It critically examines the thesis that the rational projects of modern embodiment have died and gone to cyberspace and suggests that we are witnessing the rise of a virulent effervescent form of the sacred which is changing how people see and keep in touch with the world around them *Modern Hungers* Alice Weinreb,2017-05-01 During World War I and II modern states for the first time experimented with feeding and starving entire populations Within

the new globalizing economy food became intimately intertwined with waging war and starvation claimed more lives than any other weapon As Alice Weinreb shows in *Modern Hungers* nowhere was this new reality more significant than in Germany which struggled through food blockades agricultural crises economic depressions and wartime destruction and occupation at the same time that it asserted itself as a military cultural and economic powerhouse of Europe The end of armed conflict in 1945 did not mean the end of these military strategies involving food Fears of hunger and fantasies of abundance were instead reframed within a new Cold War world During the postwar decades Europeans lived longer possessed more goods and were healthier than ever before This shift was signaled most clearly by the disappearance of famine from the continent So powerful was the experience of post 1945 abundance that it is hard today to imagine a time when the specter of hunger haunted Europe demographers feared that malnutrition would mean the end of whole nations and the primary targets for American food aid were Belgium and Germany rather than Africa Yet under both capitalism and communism economic growth as well as social and political priorities proved inseparable from the modern food system Drawing on sources ranging from military records to cookbooks to economic and nutritional studies from a multitude of archives *Modern Hungers* reveals similarities and striking ruptures in popular experience and state policy relating to the industrial food economy In so doing it offers historical perspective on contemporary concerns ranging from humanitarian food aid to the gender wage gap to the obesity epidemic *Modern Americanism* John William Gibson, E. E. Miller, 1911
