**Ideology, Social Theory, and the Environment** William D. Sunderlin,2003 This book shows that polemical environmental and ecological debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to

conceptualizing the cause nature and resolution of environmental problems      **Restoration & Management Notes** ,1997

Environmental Groups Patricia D. Netzley,1998 Examines the history tactics and effectiveness of various grassroots and national level environmental groups as well as the state of the environment and the economic costs of protecting it      **The Struggle for Russian Environmental Policy** Ilmo Massa,Veli-Pekka Tynkkynen,2001      Science and Environmental Decision Making Mark Huxham,David Sumner,2000 Science is vital in informing the increasingly urgent and complex environmental decisions that affect all our lives from international agreements on action to limit climate change to decisions on growing genetically modified crops It is clear however that many environmental decisions are taken in the face of scientific uncertainty or ignorance and involve questions of politics and ethics that go beyond science Science alone cannot answers such questions as Are the risks of nuclear power acceptable and Why should we conserve wild species Science and Environmental Decision Making explores the use and limitations of science in helping to answer environmental questions emphasising the importance of ethics politics and sociology in the decision making process Starting with the question What is meant by a scientific explanation the first three chapters provide a simple introduction to the philosophy and sociology of science and the importance of these fields to environmental scientists They explain the logic of testing ideas in science and look at some of the absolute limits of scientific explanation showing how value judgements inevitably influence scientific work before exploring commercial and political influences on science Chapters 4 10 show how these themes are relevant in case studies ranging from genetic engineering in agriculture to conservation marine eutrophication and the use of models and radiation protection Each chapter is written by a researcher active in the area and begins with an editorial introduction highlighting the major themes illustrated by the case study This book is aimed at students of ecology environmental science environmental management and geography It will also be useful reading for sociology students who study how the science is applied      *Postgraduate Prospectus* University of London. Institute of Latin American Studies,2002      **Deliberative Environmental Politics** Walter F. Baber,Robert V. Bartlett,2005 Linking theory and practice this book explores the potential of deliberative democracy to produce more effective environmental policy      *The Oxford Companion to Global Change* David J.
