Modern Natural:

Mechanism, Life and Mind in Modern Natural Philosophy Charles T. Wolfe, Paolo Pecere, Antonio Clericuzio, 2022-11-14 This volume emphasizes the diversity and fruitfulness of early modern mechanism as a program as a concept as a model Mechanistic study of the living body but also of the mind and mental processes are examined in careful historical focus dealing with figures ranging from the first rank Bacon Descartes Spinoza Cudworth Gassendi Locke Leibniz Kant to less well known individuals Scaliger Martini or prominent natural philosophers who have been neglected in recent years Willis Steno etc The volume moves from early modern medicine and physiology to late Enlightenment and even early 19th century psychology always maintaining a conceptual focus It is a contribution to a newly active field in the history and philosophy of early modern life science It is of interest to scholars studying the history of medicine and the development of mechanistic theories Early Modern Natural Law Theories T. Hochstrasser, P. Schröder, 2013-06-29 The study of natural law theories in the early Enlightenment continues to be one of the most fruitful areas of research in early modern intellectual history In recent years there have been substantial reassessments of Grotius Pufendorf Thomasius 1 and the whole university based tradition associated with the Fr haujkl rung The appeal of the discourse of natural jurisprudence to groups and individuals operating outside conventional educational and political structures such as the Huguenot diaspora has also been highlighted Moreover the contextual understanding of the work of unambiguously major philosophers such as Hobbes and Kant and its reception has been greatly enhanced by studies that have sought to view them as 3 participants in rather than bystanders alongside the discourse of natural law Thus thinkers previously not considered central to this discourse have been incorporated into it afresh However there is no danger of natural jurisprudence going unchallenged as the meta discourse of political theory in this period for recently new studies of the role of libertine and jansenist thought in shaping the priorities of the early Republic of Letters have challenged its position among the intellectual 4 achievements of the social and political theory of the early Enlightenment This volume therefore offers a timely opportunity to reassess both the coherence of the concept of early Enlightenment and the specific contribution of natural law theories to it **The Posen Library of Jewish Culture and Civilization, Volume 8** Todd M. Storm Over the Constitution Harry V. Jaffa, 1999-01-01 Written by one of America's foremost political and legal theorists Storm Over the Constitution examines the arguments of some of the leading proponents of the doctrine of original intent According to legal scholars such as Judge Robert Bork Lino Gralia Charles Cooper and Supreme Court Justice Antonin Scalia a jurisprudence of original intent requires that judges bring no theory to the interpretation of the Constitution In this brilliant new book Harry Jaffa illustrates how judges under the influence of this definition of original intent particularly neglect the Declaration of Independence as a guide Jaffa shows that this definition is from the point of view of the American Founding anything but original moreover it is openly hostile to the natural rights theory of those who wrote and ratified the Constitution The author implores Americans to follow the example set by Abraham Lincoln who admired the Declaration of Independence more openly interpreted it more deeply and implemented it more practically than any other president before or since Lincoln's achievement fulfilled a tradition of civic understanding and scholarship closer in time and purpose to the founders and was thus more original **The Natural Theology of Natural Beauty** Richard St. John Tyrwhitt, 1882
