*Imagining the Modern City* James Donald, 1999 Paris Berlin London Singapore New York Chicago Los Angeles these define the city in the world's consciousness James Donald takes us on a psychic journey to these places that have inspired artists writers architects and filmmakers for centuries Considering the cultural and political implications of the urban imaginary Donald explores the pleasures and challenges of modern living contending that the imagined city remains the best lens for a future of democratic community How can we think of Chicago without recalling the grittiness of The Asphalt Jungle's back alleys or of London without the dank foggy atmosphere so often evoked by Dickens When de Certeau explores what it means to walk through a city or Foucault dissects the elements of the modern attitude what are they telling us about modernity itself Through a discussion of these and many other questions about urban thought Donald demonstrates how artists and social critics have seen the city as the locus not just of vanity squalor and injustice but also of civilized society's highest aspirations Imagining the modern City also looks at how artists have shaped cities through their creation of public spaces sculpture and architecture art forms that help determine our ideas about our place in the urban environment Planners and architects such as Otto Wagner Le Corbusier and Bernard Tschumi present us with real and possible cities showing a way forward to alternative social futures Donald asserts The modern city provides both a culturally resonant imagined space and a physical place for the everyday life of its residents Imagining the Modern City is a rich and dazzling exploration of the ways cities stir and shape our consciousness

Hard Looks Sean Nixon, 2024-11-01 Hard Looks is a fascinating examination of the new masculine imagery that has developed in relation to popular consumption over the last decade the author skilfully investigates the development of this new man imagery and its relationship to contemporary formations of masculinity and masculine culture Focusing on the emergence in the mid 1980s of a wide range of new representations of masculinity in the retail advertising and publishing industries the author analyses the practices and derives used to underpin the production and circulation of this imagery The author traces the novelty of these commercially produced representations and analyses their role in producing a space for an ambivalent masculine sexual identity Drawing strongly on contemporary cultural theory Hard Looks combines stimulating theoretical debates on representation and cultural identity with authoritative empirical research on the media and retail industries This lively and innovative study will prove essential reading for sociologists interested in the study of men and masculinities and students of culture media and gender studies

Nordström, 2015-05-13 Per Schlingmann and Kjell A Nordström have gazed into their crystal ball to see what the near future holds for the human race and civilisation They see a silent revolution spearheaded by cities and women They see multinational corporations being transformed into multi urban corporations They see urban becoming the new black and mayors becoming the prime ministers of our era They spot the need for new non digital competences wild knowledge

that can't be taught at universities They see an era for women women who equipped with skills and mobile phones are staking their claim in a society that's on an express train towards urbanisation     **Modernism in the Streets** Marshall Berman,2017-04-18 Essays tracing the intellectual life of a quintessential New York City writer and thinker Marshall Berman was one of the great urbanists and Marxist cultural critics of the twentieth and twenty first centuries and his brilliant nearly *sui generis* book All That Is Solid Melts Into Air is a masterpiece of the literature on modernism But like many New York intellectuals the essay was his characteristic form accommodating his multifarious interests and expressing his protean searching exuberant mind This collection includes early essays from and on the radical 60s on New York City on literary figures from Kafka to Pamuk and late essays on rock hip hop and gentrification Concluding with his last essay completed just before his death in 2013 this book is Berman's intellectual autobiography tracing his career as a thinker through the way he read the signs in the street     **Television Cities** Charlotte Brunsdon,2018-01-19 In Television Cities Charlotte Brunsdon traces television's representations of metropolitan spaces to show how they reflect the medium's history and evolution thereby challenging the prevalent assumptions about television as quintessentially suburban Brunsdon shows how the BBC's presentation of 1960s Paris in the detective series *Maigret* signals British culture's engagement with twentieth century modernity and continental Europe while various portrayals of London ranging from Dickens adaptations to the 1950s nostalgia of *Call the Midwife* demonstrate Britain's complicated transition from Victorian metropole to postcolonial social democracy Finally an analysis of *The Wire*'s acclaimed examination of Baltimore marks the profound shifts in the ways television is now made and consumed Illuminating the myriad factors that make television cities Brunsdon complicates our understanding of how television shapes perceptions of urban spaces both familiar and unknown     **Introduction to Cities**

Xiangming Chen,Anthony M. Orum,Krista E. Paulsen,2018-04-30 The revised and updated second edition of *Introduction to Cities* explores why cities are such a vital part of the human experience and how they shape our everyday lives Written in engaging and accessible terms *Introduction to Cities* examines the study of cities through two central concepts that cities are places where people live form communities and establish their own identities and that they are spaces such as the inner city and the suburb that offer a way to configure and shape the material world and natural environment *Introduction to Cities* covers the theory of cities from an historical perspective right through to the most recent theoretical developments The authors offer a balanced account of life in cities and explore both positive and negative themes In addition the text takes a global approach with examples ranging from Berlin and Chicago to Shanghai and Mumbai The book is extensively illustrated with updated maps charts tables and photographs This new edition also includes a new section on urban planning as well as new chapters on cities as contested spaces exploring power and politics in an urban context It contains information on the status of poor and marginalized groups and the impact of neoliberal policies material on gender and sexuality and presents a greater range of geographies with more attention to European Latin American and African cities Revised and updated

**Kierkegaard and the Question Concerning Technology** Christopher B. Barnett, 2019-08-22 Over the last several decades technology has emerged as an important area of interest for both philosophers and theologians Yet despite his status as one of modernity's seminal thinkers Søren Kierkegaard is not often seen as one who contributed to the field Kierkegaard and the Question Concerning Technology argues otherwise Christopher B Barnett shows that many of Kierkegaard's criticisms of the present age relate to the increasing dominance of technology in the West and he puts Kierkegaard's thought in conversation with subsequent thinkers who grappled with technological issues from Martin Heidegger to Thomas Merton Barnett shows that Kierkegaard's writing with its marked emphases on personal upbuilding stands as a place where deeper non technical modes of thinking are both commended and nurtured In doing so Barnett presents a Kierkegaard who remains relevant perhaps all too relevant in today's digital age      *The Accidental Possibilities of the City* Katherine Smith, 2021-03-02

Claes Oldenburg's commitment to familiar objects has shaped accounts of his career but his associations with Pop art and postwar consumerism have overshadowed another crucial aspect of his work In this revealing reassessment Katherine Smith traces Oldenburg's profound responses to shifting urban conditions framing his enduring relationship with the city as a critical perspective and conceiving his art as urban theory Smith argues that Oldenburg adapted lessons of context gleaned from New York's changing cityscape in the late 1950s to large scale objects and architectural plans By examining disparate projects from New York to Los Angeles she situates Oldenburg's innovations in local geographies and national debates In doing so Smith illuminates patterns of urbanization through the important contributions of one of the leading artists in the United States      **The Builder**, 1877      *Italy Through the Stereoscope* Daniel James Ellison, 1908      **The Independent**
