Necessary Objects Lois Gould,1972 The folder may include clippings announcements small exhibition catalogs advertisements and other ephemeral items *A Critical Assessment of Contemporary Cosmological Arguments* Emanuel Rutten, Ever since Plato philosophers have developed rational arguments for the existence of God In the last decades the philosophical interest in these arguments has grown again significantly In this book cosmological arguments are investigated A cosmological argument derives the existence of God from the fact that there exist caused things In the first part of this book the author argues that these arguments show that it is plausible that the cosmos was brought about by a necessarily existing conscious free being However as is shown as well it does not follow that this being is also the first cause of the whole of reality something typically said of God In the second part of the book a new argument for the existence of a first cause is presented based on the premises of atomism and causalism Subsequently the author proposes a new modal epistemic argument for the existence of a conscious free being who is the first cause of reality Objections to both new arguments are evaluated and refuted The book concludes with the observation that these arguments can be combined with cosmological arguments in order to arrive at a renewed case for theism *Necessary Existence* Alexander R. Pruss,Joshua L. Rasmussen,2018-03-01 Necessary Existence breaks ground on one of the deepest questions anyone ever asks why is there anything The classic answer is in terms of a necessary foundation Yet why think that is the correct answer Pruss and Rasmussen present an original defense of the hypothesis that there is a concrete necessary being capable of providing a foundation for the existence of things They offer six main arguments divided into six chapters The first argument is an up to date presentation and assessment of a traditional causal based argument from contingency The next five arguments are new possibility based arguments that make use of twentieth century advances in modal logic The arguments present possible pathways to an intriguing and far reaching conclusion The final chapter answers the most challenging objections to the existence of necessary things *Two Arguments for the Identity of Indiscernibles* Gonzalo Rodriguez-Pereyra,2022 Gonzalo Rodriguez Pereyra presents two arguments for the principle that no two objects can differ only numerically He shows that the principle cannot be reduced to a triviality and that restricted versions concerning only qualitative properties face problems The Standard Cyclopedia of Horticulture Liberty Hyde Bailey,1919 Handbook of Practical Botany Eduard Strasburger,1887 Index to United States Documents Relating to Foreign Affairs, 1828-1861 Adelaide Rosalia Hasse,1921 **The Fortnightly** ,1918 *The History of Belgium: Cæsar to Waterloo* Demetrius Charles Boulger,1902 Documents Illustrative of the Formation of the Union of the American States Library of Congress.
