Procedures and Basic Diagnostic Methods
for Practicing Veterinarians

ALBERT C. STRAFUSS, D.V.M., M.S., PH.D.

This illustrated manual, designed to aid veterinary practitioners and students in establishing diagnoses, emphasizes necropsy gross pathologic diagnosis and supportive laboratory procedures. The orderly and systematic necropsy procedure outlined herein stresses a philosophy of "collect and do" instead of "collect and send," and eliminates the necessity of devising a different procedure for each species by providing appropriate modifications of the basic necropsy procedure for the dog. Specific chapters address postmortem changes versus antemortem lesions, specimen collection and submission, clinical bacteriology, diagnosis of parasitism in domestic animals, diagnostic evaluation of bovine ingestu, abortion problems, the disposal of dead animals and birds, and malpractice in veterinary medicine. The veterinarian will also find invaluable the special sections on avian necropsy and the common gross pathological findings in small farm flocks, commercial poultry, cage birds, and game birds.
