## **Negotiating Property In Africa Hardcover:**

**Negotiating Property in Africa** ,2002    **Negotiating Property in Africa** Kristine Juul,Christian Lund,2002 This collection of essays by prominent Africanists examines the negotiations and tactical and strategic maneuvers that Africans employ to secure their claims to land    **The Politics of Truth and Reconciliation in South Africa** Richard Wilson,2001-05-02 The South African Truth and Reconciliation Commission TRC was set up to deal with the human rights violations of apartheid during the years 1960 1994 However as Wilson shows the TRC s restorative justice approach to healing the nation did not always serve the needs of communities at a local level Based on extended anthropological fieldwork this book illustrates the impact of the TRC in urban African communities in Johannesburg While a religious constituency largely embraced the commission s religious redemptive language of reconciliation Wilson argues that the TRC had little effect on popular ideas of justice as retribution This provocative study deepens our understanding of post apartheid South Africa and the use of human rights discourse It ends on a call for more cautious and realistic expectations about what human rights institutions can achieve in democratizing countries

**Constituting Democracy** Heinz Klug,2000 This book explores the role of constitutionalism in facilitating political change in South Africa    **Modernism and the Grounds of Law** Peter Fitzpatrick,2001-05-02 Existing approaches to the relation of law and society have for a long time seen law as either autonomous or grounded in society Drawing on untapped resources in social theory Fitzpatrick finds law pivotally placed in and beyond modernity Being itself of the modern law takes impetus and identity from modern society and through incorporating pre modern elements of savagery and the sacred it comes to constitute that very society When placing law in such a crucial position for modernity Fitzpatrick ranges widely from the colonizations of the Americas through the thought of the European Enlightenment and engages finally with contemporary arrogations of the global By extending his previous work on the origins of modernity this book makes a significant contribution to continuing developments in law and society legal philosophy and jurisprudence

**Judicial Review and Bureaucratic Impact** M. L. M. Hertogh,Simon Halliday,2004-08-19 International scholars from political science and law socio legal studies present new research which focuses on the relationship between judicial review and bureaucratic behaviour Individual chapters consider fundamental conceptual and methodological issues in addition to presenting empirical case studies from various parts of the world the United States Canada Australia Israel and the United Kingdom This is a landmark text offering an international interdisciplinary and empirical perspective on judicial review s impact on bureaucracies It will significantly advance the research agenda concerning judicial review and its relationship to social change

**Law, Anthropology, and the Constitution of the Social** Alain Pottage,Martha Mundy,2004-06-24 This collection of interdisciplinary essays explores how persons and things the central elements of the social are fabricated by legal rituals and institutions The contributors legal and anthropological theorists alike focus on a set of specific institutional and ethnographic contexts and some unexpected and thought provoking

analogies emerge from this intellectual encounter between law and anthropology. For example contemporary anxieties about the legal status of the biotechnological body seem to resonate with the questions addressed by ancient Roman law in its treatment of dead bodies. The analogy between copyright and the transmission of intangible designs in Melanesia suddenly makes western images of authorship seem quite unfamiliar. A comparison between law and laboratory science presents the production of legal artefacts in new light. These studies are of particular relevance at a time when law faced with the inventiveness of biotechnology finds it increasingly difficult to draw the line between persons and things. *Law and Globalization from Below* Boaventura de Sousa Santos, César A. Rodríguez-Garavito, 2005-09-08. This book is an unprecedented attempt to analyze the role of the law in the global movement for social justice. Case studies in the book are written by leading scholars from both the global South and the global North and combine empirical research on the ground with innovative sociolegal theory to shed new light on a wide array of topics. Among the issues examined are the role of law and politics in the World Social Forum, the struggle of the anti sweatshop movement for the protection of international labour rights and the challenge to neoliberal globalization and liberal human rights raised by grassroots movements in India and indigenous peoples around the world. These and other cases the editors argue signal the emergence of a subaltern cosmopolitan law and politics that calls for new social and legal theories capable of capturing the potential and tensions of counter hegemonic globalization. *Social Citizenship and Welfare in the United States and Western Europe* Joel F. Handler, 2004-04-29. This book compares welfare policies in the United States and active labor policies in Western Europe that are aimed primarily at the long term unemployed, unemployed youth, lone parents, immigrants and other vulnerable groups often referred to collectively as the socially excluded. The Europeans maintain that welfare is the best method of bringing the socially excluded back into mainstream society. Although there are differences in terms of ideology and practice, Joel F. Handler argues that there are also significant similarities especially field level practices that serve to exclude those who are the least employable or lack other qualifications that agencies favor. The author also examines strategies for reform including protective labor legislation, the Open Method of Coordination, the reform of social and employment services and concludes with an argument for a basic income guarantee which would not only alleviate poverty but also provide clients with an exit option. *Law and Nature* David Delaney, 2003-10-13. This interdisciplinary study explores the relationship between conceptions of nature and largely American legal thought and practice. It focuses on the politics and pragmatics of nature talk as expressed in both extra legal disputes and their transformation and translation into forms of legal discourse. tort, property, contract, administrative law, criminal law and constitutional law. Delaney begins by considering the pragmatics of nature in connection with the very idea of law and the practice of American legal theorization. He then traces a set of specific political legal disputes and arguments. The set consists of a series of contexts and cases organized around a conventional distinction between external and internal nature forces of nature, endangered species, animal experiments.
