Neighborhoods People And Community:

Neighborhoods, People, and Community Roger Ahlbrandt, 2012-11-26 This book focuses on neighborhoods and the people living in them. It describes differences among neighborhoods in terms of their social and institutional structure, attitudes of the residents, quality of life, and the characteristics of the residents. The book is based on the results of a survey of almost 6 000 residents living throughout the city of Pittsburgh. As such it provides the basis for examining groups of people as well as whole neighborhoods. The communal aspects of urban living are discussed in Chapters 1 and 2, attachment toward the neighborhood in Chapter 3, importance of religion, life cycle and race in Chapter 4, various aspects of individual social support systems and neighborhood social fabric in Chapters 5-6 and 7, the contextual aspects of the neighborhood environment in Chapters 8 and 9, and the implications for urban policy in Chapter 10. The results of the analysis described in the book provide a detailed understanding of differences in the structure and composition of urban neighborhoods and they show why some groups of people are drawn into their neighborhoods whereas others rely more upon the wider community to meet a variety of needs. The analysis provides the framework in which to address the implications for urban policy, particularly with respect to mental health prevention and neighborhood and community renewal.

Neighbors and Neighborhoods Sidney Brower, 2017 How does the design of a neighborhood affect the people who live there? In this thoughtful, engaging book, the author explains how a neighborhood's design lays the groundwork for the social relationships that make it a community. Blending social science with personal interviews, the author shares the lessons of planned communities from historic Riverside, Illinois to archetypal Levittown, New York and Disney's Celebration, Florida. Through these inspirational stories, readers will discover the characteristics of neighborhoods that promote the attitudes and behaviors of a healthy community.

Communication Systems Leo W. Jeffres,2002 This book is a call for more research into urban systems in general and communication patterns specifically within geographically defined units of analysis Community is a key concept in discussions of how technology is affecting people s lives today As the Internet links people to larger virtual communities we need to revisit how neighborhoods help people find community if urban areas are to thrive as social systems The book treats the urban system as the focus in a unique attempt to integrate the literature from communication with other disciplines focusing on cities The book employs macro systems theory in conjunction with other theories to explain how neighborhoods fit into people s search for community **People, Building Neighborhoods** United States. Cunningham,2003-01-23 This book is both important and timely Written by practitioners who are also academics the book combines solid research observation and practical experience that speak forcefully to the need for both local place based development and greater citizen involvement The examples they give of successful local efforts to renew neighborhoods demonstrate that change is possible and that resources are available for such purposes Patricia W Murphy and James V Cunningham have provided a roadmap for rebuilding many of our communities and for strengthening the foundations of our democracy *Regional Survey: Neighborhood and community planning comprising three monographs: The neighborhood unit* ,1929 *Neighborhood and Community Environments* Irwin Altman,Abraham Wandersman,2013-06-29 This ninth volume in the series deals with a fascinating and complex topic in the environment and behavior field Neighborhoods and com munities are in various stages of formation and transition in almost every society nation and culture A variety of political economic and social factors have resulted in the formation of new communities and the transformation of older communities

The Social Areas of Otsego County Dwight Sanderson,1923 **Neighborhoods, Their Place in Urban Life** Howard W. Hallman, Hallman's in depth study begins with the basic definition that a neighbourhood is both a physical place and a social community Man as a social being relies on the neighbourhood as a community which in turn becomes a manifestation of man's interdependence Neighbourhoods are analysed as personal arenas where individuals perform certain classes of action e.g shopping social communities where individuals work together in groups and take part in some form of collective life physical places where certain amenities are e.g houses and hospitals which give an area a cohesiveness as a whole political communities of varying degrees of intensity and as little economies where people buy houses rent houses employ each other etc Each aspect is examined on its own and the complete neighbourhood is viewed as a microcosm of a greater whole Hallman stresses that a neighbourhood need not have all of these facets and those it does have may overlap From this basis he looks at what neighbourhoods can mean to people how people have attempted to better their neighbourhood and how we can improve our own neighbourhoods in the future Cornell Reading Courses ,1921 Proceedings of the Conference of the American Country Life Association American Country Life Association,1921 **Proceedings of the ...
