Nelson Jeff Hill,1997 French rule in Syria and Lebanon coincided with the rise of colonial resistance around the world and with profound social trauma after World War I In this tightly argued study Elizabeth Thompson shows how Syrians and Lebanese mobilized like other colonized peoples to claim the terms of citizenship enjoyed in the European metropole The negotiations between the French and citizens of the Mandate set the terms of politics for decades after Syria and Lebanon achieved independence in 1946 Colonial Citizens highlights gender as a central battlefield upon which the relative rights and obligations of states and citizens were established The participants in this struggle included not only elite nationalists and French rulers but also new mass movements of women workers youth and Islamic populists The author examines the gendered battles fought over France's paternalistic policies in health education labor and the press Two important and enduring political structures issued from these conflicts First a colonial welfare state emerged by World War II that recognized social rights of citizens to health education and labor protection Second tacit gender pacts were forged first by the French and then reaffirmed by the nationalist rulers of the independent states These gender pacts represented a compromise among male political rivals who agreed to exclude and marginalize female citizens in public life This study provides a major contribution to the social construction of gender in nationalist and postcolonial discourse Returning workers low ranking religious figures and most of all women to the narrative history of the region figures usually omitted Colonial Citizens enhances our understanding of the interwar period in the Middle East providing needed context for a better understanding of statebuilding nationalism Islam and gender since World War II     *The Golden Age* Ian Inkster,Colin Griffin,Judith Rowbotham,2017-07-05 In 1850 the Industrial Revolution came to an end In 1851 the Great Exhibition illustrated to the whole world the supremacy of industrial England For the next twenty years Britain reigned supreme From around 1870 Britain began to decline Britain is now a second rate power with strong memories of its former supremacy The above five sentences summarise a common view of the sequencing of Britain's rise and relative fall a stereotype that is challenged and modified in the essays of *The Golden Age* By concentrating on central aspects of social and industrial change authors expose the underpinnings of supremacy its unsung underside its tarnished gold Major themes cover industrial and technological change social institutions and gender relations in a period during which industry and industrialism were equally celebrated and nurtured Against this background it is difficult to argue for any sudden decline of energy assets or institution nor for any significant move from an industrial society to one in which a hearty manufacturing was replaced by commerce and land sensibility and artifice     *Millions Like Us'?* Visiting Senior Fellow Department of Psychology Nicky Hayes,1999-01-01 This collection of essays brings together the latest historical research on cultural production and reception during the Second World War It covers the way in which cultural provision was viewed by the labour movement and industry
