## Nelsons Ships:

**The Anatomy of Nelson's Ships** Dr. C. Nepean Longridge, 2017-06-28 The history of Admiral Horatio Nelson has been written from every possible angle but this was not so with his ships. Not until this work was first published in 1955 Before then such information as there was about the ships was buried in archives on Naval Architecture only the top expert could have sifted it and present it in a usable form Dr Longridge was that expert and his work became a veritable treasure trove for every naval historian and ship modeller. His research is supported by 271 detailed line drawings rare photographs and fold out plans showing hull framing interior construction complexing and deck layouts

**Nelson's Ships** Derek Gardner, 2005

No man of action in British history has seized and held public affection more firmly than Horatio Nelson. His name remains a by word for heroism for awesome courage and devotion to duty in the face of awful physical frailty

**Long-ships from the beginning of the Christian era to end of the Crusades** John Forsyth Meigs, 1924 Life In Nelson's Navy Dudley

Pope, 2013-03-08 This is a well researched and highly readable account of naval life both ashore and at sea from a respected and admired historian and writer of whom it was written An author who really knows Nelson's navy Ramage's Prize The

Observer and An expert knowledge of naval history Ramage at Trafalgar The Guardian Nelson's Arctic Voyage Peter

Goodwin, 2019-05-16 In the summer of 1773 the 14 year old Horatio Nelson took part in an expedition to the Arctic which came close to ending his naval career before it had begun. The expedition was to find a navigable northern passage between the Atlantic and Pacific and was supported by the Royal Society and King George III. Two bomb vessels HMS Racehorse and Carcass were fitted out and strengthened under the command of Captain Hon Constantine Phipps. It was an extremely cold Arctic summer and the ships became locked in ice far from Spitzbergen and were unable to cut their way out until days later when the wind changed and the ice broke up. The ships were extricated and returned home. On the trip the young Nelson had command of one of the smaller boats of the ships a four oared cutter manned by twelve seamen. In this he helped to save the crew of a boat belonging to the Racehorse from an attack by a herd of enraged walruses. He also had a more famous encounter with a polar bear while attempting to obtain a bearskin as a present for his father an exploit that later became part of the Nelson legend. Drawing on the ship's journals and expedition commander Phipps journal from the National Archives

the book creates a picture of the expedition and life on board Using the ships muster books it also details the ship s crews giving the different roles and ranks in the ships The book is illustrated using some of the ship s drawings and charts and pictures of many objects used on the ship while a navigational chart of the route taken has been created from the logbooks The book also looks at the overall concept of naval exploration as set in train by Joseph Banks and the Royal Society The fact that the expedition failed as a result of poor planning with potentially tragic results demonstrates the difficulties and uncertainties of such an expedition It also looks at a great naval commander at the earliest stage of his career and considers how the experience might have shaped his later career and attitudes Other great captains and voyages are discussed alongside Nelson including Captain Cook and his exploration of the south seas and the later ill fated northern journeys of Franklin and Shackleton
