Vacant NL Netherlands Architecture Institute (Roterdão, Holanda), 2010 **Netherlands Architecture Institute** Nederlands Architectuurinstituut, 1994 *Architecture of Consequence* Ole Bouman, 2009 Architecture of Consequence began life as the Dutch presentation at the São Paulo Architecture Biennale in 2009 Shape our country was the call that the Netherlands Architecture Institute NAI made to its public over a six month period The result was a deluge of proposals as the people of the Netherlands rose to the challenge of naming their needs new guidelines for food production alternative energy sources solutions for space shortage social cohesion a healthy living environment and the recalibration of economic value Formulating responses to such fundamental questions of our time is it seems everyone's business All of the above issues converge at spatial planning and design where real opportunities for social innovation still await For this project the Netherlands Architecture Institute selected 22 Dutch architecture firms with genuinely innovative ideas on these seven imperatives and the will to do something about them The result is an agenda for the future of our living environment and a proof that designers have the creative power to make it happen Architecture of Consequence proves that any notion that architecture should be an expression of its time or should do no more than express the vanity of its commissioners pales into insignificance when compared to its tremendous potential for resolving urgent societal problems **Dutch Architecture in**

Hertzberger, 2005 Gives a broad insight into Hertzberger's library and a stimulating impression of one of the most important Dutch architects alive today Rather than supplying the reader with design recipes Hertzberger has provided an essential source of inspiration to everyone involved with the design process *Networks of Design* Jonathan Glynn, Fiona Hackney, Minton, Viv, 2010-06 Networks of Design maps a new methodological territory in design studies conceived as a field of interdisciplinary inquiry and practice informed by a range of responses to actor network theory It brings together a rich body of current work by researchers in the social sciences technology material culture cultural geography information technology and systems design and design theory and history This collection will be invaluable to students and researchers in

many areas of design studies and to design practitioners receptive to new and challenging notions of what constitutes the design process Over ninety essays are thematically organised to address five aspects of the expanded notions of mediation agency and collaboration posited by network theory Ideas Things Technology Texts and People The collection also includes an important new essay on rethinking the concept of design by Bruno Latour one of the most influential figures in the philosophy and sociology of science and technology and a pioneer of actor network theory and essays deriving from forum discussions involving designers and designer makers responsive to actor network theory Rather than an anthology of previously published essays Networks of Design presents work in progress on design theory and its applications It is the outcome of a live and vigorous debate on the possibilities and actualities offered by actor network led conceptualisations of the relationships and processes constituting design All the essays many collaborative derive from papers presented at the international conference of the Design History Society held at University College Falmouth UK in the Autumn of 2008
