references from the book on a variety of devices      Mesenteric Principles of Gastrointestinal Surgery John Calvin Coffey, Rishabh Sehgal, Dara Walsh, 2017-03-27 Mesenteric based gastrointestinal and colorectal surgery has been practiced internationally for over a century. However, it is not yet universally adopted and considerable variations exist. Such variations are explained by the historical disparity that has persisted between anatomic and surgical approaches to the intestinal mesentery. While mesenteric based surgery is far from new, it is remarkable that its anatomic basis has only recently been formally described. This means that key mesenteric principles of intestinal and colorectal surgery can now be taught, conducted, and developed in an entirely standardised manner. This book is composed of two parts. In this new book, surgical anatomy, activities, and operations are carefully defined and beautifully illustrated to enable all surgeons to conduct mesenteric based intestinal and colorectal surgery appropriately and with confidence.      *Kidney and Urinary Tract Diseases in the Newborn* Aftab S. Chishti, Shumyle Alam, Stefan G. Kiessling, 2013-12-11 This book provides a comprehensive and up-to-date overview of all key issues related to kidney and urinary tract disease in full-term and premature newborns. Among the many topics addressed are fluid and electrolyte abnormalities, hydronephrosis, urinary tract infection, obstructive uropathy, and renal replacement therapy. The approach throughout is clinically oriented, the aim being to provide the reader with hands-on guidance. Each chapter commences with a clinical case vignette and concludes with a take-home message highlighting key aspects of practical importance. In addition, however, informative reviews of the literature and the basic sciences are included. No other book currently on the market focuses solely on the newborn. *Kidney and Urinary Tract Diseases in the Newborn* will be especially valuable to those undergoing fellowship training in neonatology or pediatric nephrology/urology.      Annals of the New York Academy of Sciences Thomas Lincoln Casey, Gilbert Van Ingen, Charles Lane Poor, Edmund Otis Hovey, Ralph Winfred Tower, 1998.
