

Network Exchange Theory Experiments

Power-dependence theory spawned a cottage industry of experimental & simulation studies based on computerized laboratories. Sociologists tested NET propositions about variations in exchange network forms, in which structural positions control differing resources and opportunities to increase power & rewards by deals with alternative exchange partners.

Core design elements in NET experiments include:

- ❑ Differential distribution of valued resources among set of actors
- ❑ Structurally restricted opportunities for dyads to exchange
- ❑ Exchange relations link all actors into single network structure
- ❑ Actors seek profits by negotiating exchange prices with alters

Network Theory Applied to Artists' Structures** Liane Ditzer,2016-02-03 Document from the year 2013 in the subject Art Installation Action Performance Art Modern Art grade 2 0 University of Dusseldorf Heinrich Heine Media

and Cultural Studies language English abstract This work focuses on performance art networks The foundation and development of these virulent globally active structures was not conditional on the Internet It is a field that despite its international presence and continuity lasting more than 20 years has been documented in relatively few research projects It will investigate three projects that stand exemplarily for these networks within the scope of this work The Artists Village TAV in Singapore PAErsche in Germany and Black Market International BMI which has no national localisation A major part of this work will deal with the actions of these three networks of which TAV and BMI were founded back in the 1980ies when the notion of networking had a very different linguistic connotation However the visions and ideas of networking were already inherent in TAV and BMI This work does not aim to carry out any basic research into the topic of networks though it will investigate the factors that bring about and define the special performance art networks

Social Exchange Theory Karen S. Cook, 1987-06 The current state of social exchange theory is assessed in this collection of original papers The volume has contributions from James S Coleman Peter M Blau and the late Richard Emerson founders of social exchange theory in the 1960s and from young scholars who are expanding the frontiers of the theoretical framework Jon Turner rounds off this important volume with a critique of social exchange theory as presented by the contributors As an up to date analysis of this major strand of social theory this volume is unrivalled and has wide appeal

The Growth of Social Knowledge Jacek Szmata, Michael Lovaglia, Kinga Wysienska, 2002-10-30 This is an analysis of contemporary advances in group processes research and shows how technologies such as laboratory experiments simulations and complex systems combine with the rigour of cumulative research programmes to change the way we see the social world
