Network-Centric Naval Forces National Research Council, Commission on Physical Sciences, Mathematics, and Applications, Naval Studies Board, Committee on Network-Centric Naval Forces, 2000-07-21 Network Centric Naval Forces A Transition Strategy for Enhancing Operational Capabilities is a study to advise the Department of the Navy regarding its transition strategy to achieve a network centric naval force through technology application This report discusses the technical underpinnings needed for a transition to networkcentric forces and capabilities **Network-Centric Naval Forces: A Transition Strategy for Enhancing Operational Capabilities** ,2000 The Chief of Naval Operations CNO recently declared that the Navy would be shifting its operational concept from one based on platform centric warfare concepts to one based on network centric warfare concepts This new operational concept can be described as a model of warfare called network centric warfare that derives its power from a geographically dispersed naval force embedded within an information network that links sensors shooters and command and control nodes to provide enhanced speed of decision making rapid synchronization of the force as a whole to meet its desired objectives and great economy of force Realization of a network centric warfighting capability will depend on a number of factors development of warfare concepts and supporting doctrine that determine how weapons sensors and information systems will interact to carry out specific missions experimentation to test the viability of the new concepts application of both military and commercial technology particularly information technology with essential attention to information and communications security and robustness timely and effective acquisition of information technology assets and education training and utilization of naval personnel to meet the demands of a network centric force This change of operational concept is also part of the Department of Defense DOD thrust toward Joint Vision 2010 which encompasses efforts by the four Services to achieve similar objectives DOD wide

Committee on Network-Centric Naval Forces, 2000 *Information Assurance for Network-Centric Naval Forces* National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee on Information Assurance for Network-Centric Naval Forces, 2010-04-11 Owing to the expansion of network centric operating concepts across the Department of Defense DOD and the growing threat to information and cybersecurity from lone actors groups of like minded actors nation states and malicious insiders information assurance is an area of significant and growing importance and concern Because of the forward positioning of both the Navy s afloat and the Marine Corps expeditionary forces IA issues for naval forces are exacerbated and are tightly linked to operational success Broad based IA success is viewed by the NRC s Committee on Information Assurance for Network Centric Naval Forces as providing a central underpinning to the DOD s network centric operational concept and the Department of the Navy s DON s FORCEnet operational vision Accordingly this report provides a view and analysis of information assurance in the context of naval mission assurance Network-Centric Naval Forces - Overview ,2000 **Network-Centric Naval Forces -**

**Overview ,2000      Information Assurance for Network-centric Naval Forces ,2010      The Role of Experimentation in Building Future Naval Forces** National Research Council,Division on Engineering and Physical Sciences,Naval Studies Board,Committee for the Role of Experimentation in Building Future Naval Forces,2004-12-08 The Department of Defense is in the process of transforming the nation s armed forces to meet the military challenges of the 21st century Currently the opportunity exists to carry out experiments at individual and joint service levels to facilitate this transformation Experimentation which involves a spectrum of activities including analyses war games modeling and simulation small focused experiments and large field events among other things provides the means to enhance naval and joint force development To assist the Navy in this effort the Chief of Naval Operations CNO asked the National Research Council NRC to conduct a study to examine the role of experimentation in building future naval forces to operate in the joint environment The NRC formed the Committee for the Role of Experimentation in Building Future Naval Forces to perform the study      Buying Military Transformation Peter Dombrowski,Eugene Gholz,2006-09-26 In Buying Military Transformation Peter Dombrowski and Eugene Gholz analyze the United States military s ongoing effort to capitalize on information technology New ideas about military doctrine derived from comparisons to Internet Age business practices can be implemented only if the military buys technologically innovative weapons systems Buying Military Transformation examines how political and military leaders work with the defense industry to develop the small ships unmanned aerial vehicles advanced communications equipment and systems of systems integration that will enable the new military format Dombrowski and Gholz s analysis integrates the political relationship between the defense industry and Congress the bureaucratic relationship between the firms and the military services and the technical capabilities of different types of businesses Many government officials and analysts believe that only entrepreneurial start up firms or leaders in commercial information technology markets can produce the new network oriented military equipment But Dombrowski and Gholz find that the existing defense industry will be best able to lead military technology development even for equipment modeled on the civilian Internet The U S government is already spending billions of dollars each year on its military transformation program money that could be easily misdirected and wasted if policymakers spend it on the wrong projects or work with the wrong firms In addition to this practical implication Buying Military Transformation offers key lessons for the theory of Revolutions in Military Affairs A series of military analysts have argued that major social and economic changes like the shift from the Agricultural Age to the Industrial Age inherently force related changes in the military Buying Military Transformation undermines this technologically determinist claim commercial innovation does not directly determine military innovation instead political leadership and military organizations choose the trajectory of defense investment Militaries should invest in new technology in response to strategic threats and military leaders professional judgments about the equipment needed to improve military effectiveness Commercial technological progress by itself does not generate an imperative for military transformation Clear cogent and engaging

Buying Military Transformation is essential reading for journalists legislators policymakers and scholars      Systems of Systems Engineering Mo Jamshidi, 2017-12-19 As technology presses forward scientific projects are becoming increasingly complex The international space station for example includes over 100 major components carried aloft during 88 space flights which were organized by over 16 nations The need for improved system integration between the elements of an overall larger technological system has sparked further development of systems of systems SoS as a solution for achieving interoperability and superior coordination between heterogeneous systems Systems of Systems Engineering Principles and Applications provides engineers with a definitive reference on this newly emerging technology which is being embraced by such engineering giants as Boeing Lockheed Martin and Raytheon The book covers the complete range of fundamental SoS topics including modeling simulation architecture control communication optimization and applications Containing the contributions of pioneers at the forefront of SoS development the book also offers insight into applications in national security transportation energy and defense as well as healthcare the service industry and information technology System of systems SoS is still a relatively new concept and in time numerous problems and open ended issues must be addressed to realize its great potential This book offers a first look at this rapidly developing technology so that engineers are better equipped to face such challenges      *Architecture and Principles of Systems Engineering* Charles Dickerson, Dimitri N. Mavris, 2016-04-19 The rapid evolution of technical capabilities in the systems engineering SE community requires constant clarification of how to answer the following questions What is Systems Architecture How does it relate to Systems Engineering What is the role of a Systems Architect How should Systems Architecture be practiced A perpetual reassessment of concepts and practices is taking place across various systems disciplines at every level in the SE community Architecture and Principles of Systems Engineering addresses these integral issues and prepares you for changes that will be occurring for years to come With their simplified discussion of SE the authors avoid an overly broad analysis of concepts and terminology Applying their substantial experience in the academic government and commercial R D sectors this book is organized into detailed sections on Foundations of Architecture and Systems Engineering Modeling Languages Frameworks and Graphical Tools Using Architecture Models in Systems Analysis and Design Aerospace and Defense Systems Engineering Describing ways to improve methods of reasoning and thinking about architecture and systems the text integrates concepts standards and terminologies that embody emerging model based approaches but remain rooted in the long standing practices of engineering science and mathematics With an emphasis on maintaining conceptual integrity in system design this text describes succinct practical approaches that can be applied to the vast array of issues that readers must resolve on a regular basis An exploration of the important questions above this book presents the authors invaluable experience and insights regarding the path to the future based on what they have seen work through the power of model based approaches to architecture and systems engineering      **Department of Defense Appropriations for 1999** United States.
