Networking means to create nets of relations where the publisher and the reader the artist and the audience act on the same level The book is a first tentative reconstruction of the history of artistic networking in Italy through an analysis of media and art projects which during the past twenty years have given way to a creative shared and aware use of technologies from video to computers contributing to the creation of Italian hacker communities The Italian network proposes a form of critical information disseminated through independent and collective projects where the idea of freedom of expression is a central theme In Italy thanks to the alternative use of Internet during the past twenty years a vast national network of people who share political cultural and artistic views has been formed The book describes the evolution of the Italian hacktivism and net culture from the 1980s till today It builds a reflection on the new role of the artist and author who becomes a networker operating in collective nets reconnecting to Neoavant garde practices of the 1960s first and foremost Fluxus but also Mail Art Neoism and Luther Blissett A path which began in BBSes alternative web platforms spread in Italy through the 1980s even before the Internet even existed and then moved on to Hackmeetings to Telestreet and networking art by different artists such as 0100101110101101 ORG epidemiC Jaromil Giacomo Verde Giovanotti Mondani Meccanici Correnti Magnetiche Candida TV Tommaso Tozzi Federico Bucalossi Massimo Contrasto Mariano Equizzi Pigreca Molleindustria Guerriglia Marketing Sexyshock Phag Off and many others      **An Aesthesia of Networks** Anna Munster,2013-05-17

The experience of networks as the immediate sensing of relations between humans and nonhuman technical elements in assemblages such as viral media and databases Today almost every aspect of life for which data exists can be rendered as a network Financial data social networks biological ecologies all are visualized in links and nodes lines connecting dots A network visualization of a corporate infrastructure could look remarkably similar to that of a terrorist organization In *An Aesthesia of Networks* Anna Munster argues that this uniformity has flattened our experience of networks as active and relational processes and assemblages She counters the network anaesthesia that results from this pervasive mimesis by reinserting the question of experience or aesthesia into networked culture and aesthetics Rather than asking how humans experience computers and networks Munster asks how networks experience what operations they perform and undergo to change and produce new forms of experience Drawing on William James s radical empiricism she asserts that networked experience is assembled first and foremost through relations which make up its most immediately sensed and perceived aspect Munster critically considers a range of contemporary artistic and cultural practices that engage with network technologies and techniques including databases and data mining the domination of search in online activity and the proliferation of viral media through

YouTube These practices from artists who undermine data to musicians and VJs who use intranetworked audio and video software environments are concerned with the relationality at the core of today's network experience *Elements of Art Criticism* George Whitefield Samson, G.
