**Frank V. Chambers, E. V. Wenzell**

## Models Close Up:

**Models Close-up** David Bailey,1998 [Exploring Intersemiotic Translation Models](#) Haoxuan Zhang,2023-06-29 This volume sets out a new paradigm in intersemiotic translation research drawing on the films of Ang Lee to problematize the notion of films as the simple binary of transmission between the verbal and non verbal The book surveys existing research as a jumping off point from which to consider the role of audiovisual dimensions going beyond the focus on the verbal as understood in Jakobsonian intersemiotic translation The volume outlines a methodology comprising a system of various models which draw on both translation studies and film studies frameworks with each model illustrated with examples from Ang Lee s Crouching Tiger Hidden Dragon Lust Caution and Life of Pi In situating the discussion within the work of a director whose own work straddles East and West and remediates between cultures and semiotic systems Zhang argues for an understanding of intersemiotic translation in which films are not simply determined by verbal source material but through the process of intersemiotic translators mediating non verbal quality determining materials into the final film The volume looks ahead to implications for translation and film research more broadly as well as other audiovisual media This book will appeal to scholars interested in translation studies film studies media studies and cultural studies in general **Close-up**

**and Macro Photography** Adrian Davies,2010 In this exhaustive guide to macro photography respected author and photographer Adrian Davies takes a comprehensive approach to the subject covering every aspect of the multi faceted and often complicated world of close up photography Everything about Adrian s approach is both practical and diverse with optimal output always in mind His coverage of equipment for example goes beyond cameras to cover the application of flatbed and film scanners for close up shots 2D 3D reflective and translucent subjects Seperate sections cover cameras and equipment lenses lighting workflow and image processing Additionally a seperate section on special subjects covers techniques for shooting both common macro subjects including insects fossils and coins as well as a range of technical elements such as shiny surfaces texture and polarised light The appendix includes a technical discussion on depth of field including detailed tables and a range of optical formulae Clear concise and comprehensive and packed with stunning images this is a must have purchase for all photographers looking for professional quality macro results **The Model Book** Stephan M.
