Modern Architect:

Making it Modern Aaron Betsky, 2016-12-15 At its root modernism is that fundamental It is a question of having something to represent that is of the moment In the most radical interpretation modernism always comes too late The modern is that which is always new which is to say always changing and already old by the time it has appeared Modernism is always a retrospective act one of documenting or trying to catch what has already appeared an attempt to fix life as it is being lived Modernity is just the very fact that we as human beings are continually remaking the world around us through our actions and are doing so consciously Modernism is a monument to or memory of that act which in its own making tries to remake the world it is pretending to represent The Modern Architect, Or, Every Carpenter His Own Master Edward Shaw, 1856

The Meaning of Modern Architecture Dr Hans Rudolf Morgenthau, 2015-09-28 Using empathy as established by the Vienna School of Art History complemented by insights on how the mind processes visual stimuli as demonstrated by late 19th century psychologists and art theorists this book puts forward an innovative interpretative method of decoding the forms and spaces of Modern buildings It proposes that Modern architecture is too diverse to be reduced to a few common formal or ornamental features Instead by relying on the viewer's innate psycho-physiological perceptive abilities the sensual and intuitive understandings of composition form and space are emphasized Modern Architecture Alan Colquhoun, 2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re-examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition

Essays in Architectural Criticism Alan Colquhoun, 1981 Preface by Kenneth Frampton Winner of the 1985 Architectural Critics Award for the best book published on architectural criticism over the past three years Since the early 1950s Alan Colquhoun's criticism and theory have acted as a conscience to a generation of architects His rigor and conceptual clarity have consistently stimulated debate and have served as an impetus for the pursuit of new directions in both theory and practice This collection of 17 of his essays marks a watershed in the development of architectural thinking over the past three decades comprising a virtual theory of Modernism in architecture In his earliest essays Colquhoun concentrated on themes that for him comprised the modernist attitude in architecture language typology and the structure of form His stance since then has consistently been to try to relate these issues to current practice and to analyze the nature of architectural expression in relation to culture Alan Colquhoun divides his time between England where he is a principal in the firm of Colquhoun Miller and the United States where he is Professor of Architecture at Princeton University
