Archival Theory, Records, and the Public Trevor Livelton, Society of American Archivists, 2003 Now in paperback Livelton considers the nature of public records from an archival perspective analyzing concepts rather than the daily realities with which public records archivists deal However his carefully reasoned conclusions provide a strong foundation on which principled rather than ad hoc decisions can be made and so will be of interest to teachers students and practitioners of archival science The author presents a general or theoretical view of public records as documents made or received and preserved by the sovereign or its agents in the conduct of governance This analysis is illustrated by a variety of examples including a discussion of freedom of information Autobiography of an Archive Nicholas B. Dirks, 2015-02-10 The decades between 1970 and the end of the twentieth century saw the disciplines of history and anthropology draw closer together with historians paying more attention to social and cultural factors and the significance of everyday experience in the study of the past The people rather than elite actors became the focus of their inquiry and anthropological insights into agriculture kinship ritual and folk customs enabled historians to develop richer and more representative narratives The intersection of these two disciplines also helped scholars reframe the legacies of empire and the roots of colonial knowledge In this collection of essays and lectures history's turn from high politics and formal intellectual history toward ordinary lives and cultural rhythms is vividly reflected in a scholar's intellectual journey to India Nicholas B Dirks recounts his early study of kingship in India the rise of the caste system the emergence of English imperial interest in controlling markets and India's political regimes and the development of a crisis in sovereignty that led to an extraordinary nationalist struggle He shares his personal encounters with archives that provided the sources and boundaries for research on these subjects ultimately revealing the limits of colonial knowledge and single disciplinary perspectives Drawing parallels to the way American universities balance the liberal arts and specialized research today Dirks who has occupied senior administrative positions and now leads the University of California at Berkeley encourages scholars to continue to apply multiple approaches to their research and build a more global and ethical archive *The Modern Reader's Bible*, 1907 **Introduction to Archival Organization and Description** Michael J. Fox, Peter L. Wilkerson, 1999-02-11 An archival collection is a unique body of information created at a particular time by a particular organization or individual as a result of a particular activity If the cultural record contained in an archive is to be accessible the archivist must examine organize and describe each collection individually Introduction to Archival Organization and Description guides the novice to an understanding of the nature of archival information and documentation Chapters cover topics such as the characteristics of archival materials the gathering and analysis of information for archival description and the implementation of descriptive tools in information systems The Introduction to series acquaints professionals and students with the complex issues and technologies in the production
