### **Control Systems Analysis and Design in**

**Modern Control Engineering** Maddison Chadwick,2017-01-30 The basic characteristic of the transient response of a closed loop system is closely related to the location of the closed loop poles If the system has a variable loop gain then the location of the closed loop poles depends on the value of the loop gain chosen It is important therefore that the designer know how the closed loop poles move in the s plane as the loop gain is varied
