Modern Philology ,1922 Vols 30 54 include 1932 56 of Victorian bibliography prepared by a committee of the Victorian Literature Group of the Modern Language Association of America     *Principles and Practice of Electroconvulsive Therapy* Keith G. Rasmussen, M.D.,2019-03-06 Even with the rise of newer neuropsychiatric brain stimulation methods electroconvulsive therapy ECT remains a widely used treatment for severe mental illness and perhaps the most effective for serious mental illness Optimal treatment requires that psychiatrists be skilled in diagnosis and familiar with the techniques of treatment That s where Principles and Practice of Electroconvulsive Therapy comes in With its up to date comprehensive coverage of all aspects of ECT this is an unrivaled resource for psychiatrists whether in practice or still in training striving for maximum treatment efficacy The book begins with an overview of what ECT is and how it is carried out followed by a brief history of the therapy from its earliest applications to its use in modern times The guide follows the typical course of treatment discussing the following Understanding the indications for ECT and selecting patients who might benefit from this therapy whether they suffer from depression mania schizophrenia or catatonia Educating patients and their families on ECT and obtaining patient consent Conducting a pretreatment medical evaluation and understanding the role of anesthesia Managing an individual ECT treatment including choosing the electrical stimulus dose and parameter combination delivering the electrical stimulus assisting with recovery problems etc Overseeing the course of treatments particularly for practitioners not personally conducting the treatments Managing patients after a course of treatments and preventing relapse Assessing and managing the memory side effects of ECT The final chapter examines other neuropsychiatric stimulation therapies in relation to ECT and explains how to choose among them All chapters conclude with easily referenced key points that summarize the most salient ideas Readers seeking to further educate themselves on ECT will also benefit from the exhaustive reference list Though particularly useful for psychiatrists and psychiatric residents Principles and Practice of Electroconvulsive Therapy with its straightforward style is a ready resource for any mental health or medical professionals interested in ECT     *Making Publics in Early Modern Europe* Bronwen Wilson,Paul Yachnin,2011-07-21 The book looks at how people things and new forms of knowledge created publics in early modern Europe and how publics changed the shape of early modern society The focus is on what the authors call making publics the active creation of new forms of association that allowed people to connect with others in ways not rooted in family rank or vocation but rather founded in voluntary groupings built on the shared interests tastes commitments and desires of individuals By creating new forms of association cultural producers and consumers challenged dominant ideas about just who could be a public person greatly expanded the resources of public life for ordinary people in their own time and developed ideas and practices that have helped create the political culture of modernity Coming from a number of disciplines including literary and cultural studies art history history of religion history of science and musicology the contributors develop analyses of a range of cases of early modern public

**Histories of Emotion** Rüdiger Schnell,2020-11-23 This study addresses two desiderata of historical emotion research reflecting on the interdependence of textual functions and the representation of emotions and acknowledging the interdependence of studies on the premodern and modern periods in the history of emotion Contemporary research on the history of emotion is characterised by a proliferation of studies on very different eras authors themes texts and aspects The enthusiasm and confidence with which situations actions and interactions involving emotions in history are discovered however has led to overly direct attempts to access the represented objects emotions feelings affects as a result too little attention has been paid to the conditions and functions of their representations That is why this study engages with the emotion research of historians from an unashamedly philological perspective Such an approach provides among other things insights into the varied often contradictory observations that can be made about the history of emotion in modernity and premodernity *Modern Problems in Psychiatry* Ernesto Lugaro,1913 *The North American Journal of Homeopathy* ,1895 **Hand-book of modern treatment and medical formularity** William B. completely ordinary chaos of postmodern everyday life Hoff s original study offers a new vision of the history of modernity and the related secularization narrative a deconstruction of the basic assumptions of postmodernism and an unfolding of a liturgically grounded concept of common sense realism **Hand-book of modern treatment and medical formulary** William B. that disturbances of any and all of its functions mental as well as physical are proper subjects for therapeutics The present work lays emphasis upon the psychical side of life as being worth quite as much consideration as the physical It sets forth doctrines of nervous and mental hygiene reconstructive factors in social organization as applied to human ills and endeavors to present a broad front to the pessimistic nihilism in therapeutics that has been too long current in these fields because the doctor's eyes have been too closely focused on the individual examples and results of human accidents Neurology and psychiatry offer the widest possible opportunities for preventive medicine as well as for therapeutic optimism The program here presented is essentially therapeutic Planned as it has been on a broad scale the more practical issues confronting the clinician have nevertheless been fully met The editors have sacrificed philosophical views for more definite guideposts wherever in the present state of our knowledge such a course seemed wiser PsycINFO Database Record c 2005 APA all rights reserved *Modern Diagnosis and Treatment of Diseases of Children* Herman Bernard Sheffield,1912 The Reviewer Emily Clark,1921 Includes section About books **Rudyard Kipling** Cyril Falls,1915
