The Intellectual repository for the New Church. (July/Sept. 1817). [Continued as] The Intellectual repository and New Jerusalem magazine. Enlarged ser., vol.1-28 New Church gen. confer,1863 The Emergence of Impartiality Kathryn Murphy, Anita Traninger, 2013-10-24 This volume exposes the contested history of a virtue so central to modern disciplines and public discourse that it can seem universal The essays gathered here however demonstrate the emergence of impartiality From the early seventeenth century the new epithet impartial appears prominently in a wide range of publications Contributors trace impartiality in various fields from news publications and polemical pamphlets to moral philosophy and historical dictionaries from poetry and drama to natural history in a broad European context and against the backdrop of religious and civil conflicts Cumulatively the volume suggests that the emergence of impartiality is implicated in the period s epochal shifts in epistemology and science religious and political discourse print culture and scholarship Contributors include J rg Jochen Berns Tam s Demeter Derek Dunne Anne Eusterschulte Christine Gerrard Rainer Godel N J S Hardy Rhodri Lewis Hanns Peter Neumann Joad Raymond Bernd Roling Bastian Ronge Richard Scholar Nathaniel Stogdill Anita Traninger and Anja Zimmermann *Contemporary Perspectives on Linnaeus* John M. Weinstock, 1985 A collection of essays on the Swedish botanist and taxonomist Carl Linnaeus written by nine internationally distinguished scholars The essays discuss the impact of Linnaeus and his work on the biological sciences from the perspectives of philosophy history of science literature and modern science Contributors Vernon Heywood Jerry Stannard David Hull Mary Winsor Wolf Lepenies Lars Gustafsson Walter Wetzels Gunnar Broberg and Tore Fr0 00ngsmyr **Nemesis Divina.[SUPPRESSED]** Carl von Linné, 1960 **A Catalogue of the Works of Linnæus (and Publications More Immediately Relating Thereto)** British Museum. Department of Printed Books, 1933 **Images of the Economy of Nature, 1650-1930** Antonello La Vergata, 2023-10-05 The book discusses ideas concerning the order and balance of nature or economy of nature from the late 17th century to the early 20th century The perspective taken is broad longue dur e and interdisciplinary and reveals the interplay of scientific philosophical moral and social ideas The story begins with natural theology dating roughly to the onset of the so called Newtonian Revolution and ends with the First World War The cut off date has been chosen for the following reasons the war changed the state of things affecting man s way of looking at and relating to nature both directly and indirectly indeed it put an end to most applications of Darwinism to society and history including interpretations of war as a form of the struggle for existence The author presents an overview of the different images of nature that were involved in these debates especially in the late 19th century when a large part of the scientific community paid lip service to Darwinism while practically each expert felt free to interpret it in his own distinct way The book also touches on the so called social Darwinism which was neither a real theory nor a common body of ideas and its various views of society and nature s economy Part of this book deals with the persistence of moralizing images of nature in the work of many authors One of the main features of the book is

its wealth of detailed quotations In this way the author gives the reader the opportunity to see the original statements on which the author bases his discussion The author privileges the analysis of different positions over a historiography offering a merely linear narrative based on general implications of ideas and theories To revisit the concept of the so called Darwinian Revolution we need to examine the various perspectives of scientists and others their language and so to speak the lenses they used when reading facts and theories The book ends with some general reflections on Darwin and Darwinisms the plural is important as a case study on the relationship between intellectual history the history of science and contextual history Written by a historian this book really gives new multidisciplinary perspectives on the Darwinian Revolution *A Catalogue of the Works of Linnaeus (and Publications More Immediately Relating Thereto) Preserved in the Libraries of the British Museum (Bloomsbury) and the British Museum (Natural History) (South Kensington)*.
