Nephrology in Clinical Practice Graeme R. D. Catto, David A. Power, 1988 First volume in a series designed principally for candidates preparing for the MRCP UK Introduces the discipline of renal medicine to medical practitioners preparing for post graduate qualifications Annotation copyrighted by Book News Inc Portland OR [Informing Clinical Practice in Nephrology](#) Mohsen El Kossi, Arif Khwaja, Meguid El Nahas, 2015-04-01 Historically clinical decisions in renal medicine have been challenged by the scarce availability of robust supportive evidence Not only are the number of randomized controlled trials RCTs in Nephrology the third lowest amongst the medical specialties but in many instances the trials themselves are of poor quality In addition practice has been further influenced by extrapolation from the outcomes of general population clinical trials which exclude renal patients The difference between the ideal trial participant and real complex cases encountered in daily practice is well recognized and further compounded in renal patients with complex pathophysiology this ultimately makes decision making in this subset of patients a real challenge Recently there has been a growing interest in conducting well designed RCTs in different areas of renal medicine However though clinical guidelines are helpful in providing the clinicians with a frame of best available evidence for a clinical condition it denies the unique nature of each individual patient This book offers a thorough and critical appraisal and evaluation of the key published clinical trials that have shaped current practice in nephrology dialysis and transplantation It will help the practicing physician close the gap between the inflexible and generalized nature of clinical guidelines and the day to day clinical decision making for individual patients It will provide the clinician with the tools required to investigate and extract the appropriate guidance to apply to individual cases in daily practice Moreover it will help improve the ability of junior colleagues to appraise available evidence in a systematic way when there is lack of local guidelines or when the guidelines are difficult to apply due to logistic constraints or barriers Lastly this book will serve as a reference for key clinical trials in different areas of renal medicine together with literature and authors views of these trials and their impact on changing practice *Nephrology, An Issue of Primary Care: Clinics in Office Practice* Samuel Snyder, 2014-11-12 This issue of Primary Care Clinics in Office Practice devoted to Nephrology is edited by Dr Samuel Snyder Articles in this issue include Secondary hypertension Update on ACE ARB DRI Workup of proteinuria Diagnosis and evaluation of renal cysts NSAIDs COX2 s and the kidney The PCP nephrologist partnership in advancing CKD Nosocomial AKI Geriatric patient with CKD Hematuria workup The kidney in obesity and Renal transplant in the primary care setting **Nephrology: Innovations in Clinical Practice, An Issue of Nursing Clinics** Chita Farrar, Deborah Ellison, 2018-11-01 In consultation with Consulting Editor Dr Stephen Krau Dr Farrar and Dr Ellison have created an issue that focuses on evidence based clinical updates and innovations in various nephrology disorders Top experts on the topic have contributed reviews on the following topics Kidney Influence on Fluids and Electrolytes Renal Diet Pharmacologic Renal Therapy Acute Renal Therapy Chronic Renal Therapy Innovations in Kidney Autoimmune Disease
