SPECIAL French Welfare State Reform James Angresano,2011-01-01 This book explores an important emergent issue what types of reforms are required to enable welfare states to preserve sustainability For the purpose of this study a sustainable welfare state is one that can remain the guarantor against social risks and adverse economic trends for all segments of their respective societies and satisfy sound fiscal criteria such as the Maastricht requirement for all members of the EMU that their fiscal budget deficit does not exceed 3% of the GDP without imposing considerable financial burdens on future generations

Development and Crisis of the Welfare State Evelyne Huber,John D. Stephens,2010-04-15 Evelyne Huber and John D Stephens offer the most systematic examination to date of the origins character effects and prospects of generous welfare states in advanced industrial democracies in the post World War II era They demonstrate that prolonged government by different parties results in markedly different welfare states with strong differences in levels of poverty and inequality Combining quantitative studies with historical qualitative research the authors look closely at nine countries that achieved high degrees of social protection through different types of welfare regimes social democratic states Christian democratic states and wage earner states In their analysis the authors emphasize the distribution of influence between political parties and labor movements and also focus on the underestimated importance of gender as a basis for mobilization Building on their previous research Huber and Stephens show how high wages and generous welfare states are still possible in an age of globalization and trade competition

Successful Budget Consolidation Uwe Wagschal, Georg Wenzelburger, 2008 Demographic change is one of the most important challenges for public finances in future In the absence of counteractive measures the increasing demand for expenditures from an ageing society will inevitably lead to a debt crisis in many European countries Nevertheless the impressive budget consolidations in some industrialized countries show that a reversal is possible In Germany the already strained state of public finances will even worsen in the medium term On the revenue side the retirement of the baby boomer generation will lead to decreasing revenues from taxes and social security contributions In terms of expenditure the ageing of society will cause higher outlays for pension payments and increase the demands for services provided by the social security system Therefore a strict budget consolidation is necessary In view of the need for budget consolidation Professor Uwe Wagschal at Ruprecht Karls Universität in Heidelberg examines what factors can explain the successful budget consolidations in 23 OECD countries between 1980 and 2005 The international comparison shows how a successful budget consolidation can be achieved through a combination of expenditure cuts and

revenue increases accompanied by reforms of the political institutions Book jacket
