Comprehension Questions

Read the passage about the importance of the environment and answer the questions that follow.

The environment is the world around us. It is the air we breathe, the water we drink, and the land we live on. The environment is also the home of many plants and animals. We need the environment to survive. Without it, we would not be able to live.

There are many ways to protect the environment. One way is to recycle. Recycling helps to reduce the amount of waste we produce. Another way is to conserve water. We can do this by turning off the tap when we brush our teeth and by taking shorter showers. We can also conserve energy by turning off the lights when we leave a room and by using energy-efficient light bulbs.

It is our responsibility to protect the environment. We can all do our part to make the world a better place for ourselves and for future generations.

Moon Missions

Brandon R. Brown

Moon Missions:

Moon Missions Edward Close, 1900-01-01 The Space Race of the mid 1900s took humankind where it had never gone before the moon This volume takes readers on their own moon mission as it outlines a contest of ultimate exploration recounts the Apollo missions and adds depth with stellar detail and stunning visual aids **The Apollo Chronicles** Brandon R. Brown, 2019-05-08 The moon landing of 1969 stands as an iconic moment for both the United States and humankind The familiar story focuses on the journey of the brave astronauts who brought home Moon rocks and startling photographs But Apollo's full account includes the earthbound engineers mounds of their crumpled paper and smoldering metal shards of exploded engines How exactly did the nation step by difficult step take men to the Moon and back In *The Apollo Chronicles* fifty years after the moon landing author Brandon R Brown himself the son of an Apollo engineer revisits the men and women who toiled behind the lights He relays the defining twentieth century project from its roots bringing the engineers work and personalities to bright life on the page Set against the backdrop of a turbulent American decade the narrative whisks audiences through tense deadlines and technical miracles from President John F Kennedy's 1961 challenge to NASA's 1969 lunar triumph as engineers confronted wave after wave of previously unthinkable challenges Brown immerses readers in key physical hurdles from building the world's most powerful rockets to keeping humans alive in the hostile void of space using language free of acronyms and technical jargon The book also pulls back from the detailed tasks and asks larger questions What did we learn about the Moon And what can this uniquely innovative project teach us today *Apollo Moon Missions* Billy W. Watkins, 2005-12-30 In 1961 President John F Kennedy issued a challenge the United States would land a man on the moon and return him safely to Earth before the end of the decade It seemed like an impossible task and one that the Russians who had launched the first satellite and put the first man into Earth orbit would surely perform before us The ingenuity passion and sacrifice of thousands of ordinary men and women from all walks of life enabled the space program to meet this extraordinary goal In all six crews would land on the moon before Congress withdrew financial backing for the program This is the story of the men and women who worked behind the scenes without fanfare or recognition to make these missions a success Thirty years later they still speak of Apollo with pride sometimes even awe After Apollo moonwalker John Young told journalist Billy Watkins in a 1999 interview that nobody knows anything about the people who helped make those flights so successful Watkins made it his mission to identify the unsung heroes and learn their stories His subjects include Julian Scheer NASA publicist Sonny Morea lead designer of the Lunar Rover Hugh Brown one of the few African Americans who worked on the Apollo program JoAnn Morgan one of the few women involved in the space program Joan Roosa widow of Apollo 14 astronaut Stuart Roosa Joe Schmitt veteran suit technician was responsible for making sure the suits were leak proof and hooked up correctly Joseph Laitin who came up with the idea for the Apollo 8 astronauts to read the first ten verses of Genesis during their Christmas Eve television broadcast from the moon and Clancy Hatelberg the Navy diver who plucked

the first humans to walk on the moon from the Pacific Ocean after the Apollo 11 landing The Apollo Missions David Baker, 2018-12-12 Long has the moon captured the imagination of world from science fiction to astrology howling wolves to lunar calendars To President John F Kennedy however the moon was a destination To put a man on the moon would be to challenge Russia's recent achievements in space exploration and assert the US's technological prowess on the world stage As we know the mission was a success and yet while everyone is familiar with Neil Armstrong's iconic line and his bold tread on the moon's dusty surface few are privy to the events leading up to this moment Former NASA engineer David Baker gives a behind the scenes account of the space race including the political impetus behind the mission the Apollo 8's lunar orbit on Christmas Eve as well as some of the tale's tragedies Bursting with fascinating stories striking photographs of the team and exclusive material provided by NASA personnel this book perfectly captures the risk complexity and gravitas of this immense journey *Walking on the Moon* Carl R. Green, 2012-07-01 Explores the Apollo 11 mission including the beginning of the Apollo program the astronauts who made the journey to the moon the technology that made it possible and the historic moon landing Provided by publisher **Eight Years to the Moon** Nancy Atkinson, 2019-07-02 A Behind the Scenes Look At NASA's incredible Journey to the Moon Space journalist and insider Nancy Atkinson weaves together the riveting story of NASA's mission to complete the greatest adventure on which humankind ever embarked This incredible account is a keepsake celebrating some of the most important and dramatic events in modern history Told through over 60 personal interviews and oral histories as well as personal photographs this tribute to the men and women who made the Apollo 11 mission a reality chronicles the highs and lows that accompanied the race to the Moon the devastating flash fire that killed the crew of Apollo 1 the awe of those who saw their years in the making contributions to space exploration blast off from Cape Canaveral the knuckle biting descent of Apollo 11 to the lunar surface a near catastrophic event on the crew's flight home the infectious excitement and jubilation across the world after the astronauts returned safely to Earth These little known stories of the dedicated engineers mathematicians and scientists in the 1960s reveal the hows of the Apollo missions and bring to life the wonder and excitement of humanity's first steps on the Moon Destination Moon Rod Pyle, 2005-11-01 The Apollo space program was the largest technological undertaking of all time and led to the greatest adventure of the 20th century Born of the cold war it was moved forward by the passion of 100 000 workers and 20 billion over ten years Over that time 12 courageous individuals stepped out onto the lunar surface and thus changed the history of humankind changing us into a space faring civilization And then it was gone Three years 9 missions six men on the surface of the moon They explored they experimented and they came home Here in one volume are the transcribed voices of the participants with expert commentary and retrospective reminiscences explained and put into context From the triumphs of Neil Armstrong to Buzz Aldrin to the near disaster of Apollo 13 Houston we've got a problem it's all here the science the adventure the glory the letdown One of the great stories of humankind's reaching for the stars NASA Moon Missions Operations Manual Dr. David

Baker,2019-07-09 Published to coincide with the 50th anniversary of the first Moon landing by Apollo 11 The story of Apollo has been told many times but most accounts stop at the first landing This book picks up where others have left off and describes the five post Apollo 11 Moon landings defined as technical developments built upon engineering excellence It was only through the robust design adopted when aerospace contractors first designed and built the Apollo spacecraft and the Lunar Module that successive evolutions were possible taking lunar landing operations far beyond what had first been envisaged This book is not intended to tell the full story of each mission but rather to describe the technical development of spacecraft and equipment necessary to grow the capability from a single EVA moonwalk of less than three hours to advanced missions where astronauts spent three full working days exploring their landing sites With the aid of a Lunar Roving Vehicle they collected a wide variety of rocks and soil and left a range of instruments at the surface powered by a thermionuclear generator As interest grows in humans returning to the Moon 50 years on from those pioneering days of lunar exploration we look again at what was accomplished at the dawn of the Space Age spurred on by a political goal and developed as a tool for science The story of the Apollo Moon missions is an expression of those achievements **Moon Missions** William F. Mellberg,1997 Delivers facts stats on each mission with numerous famed photographs Apollo's Legacy Roger D. Launius,2019-05-14 An all encompassing look at the history and enduring impact of the Apollo space program In Apollo's Legacy space historian Roger D Launius explores the many faceted stories told about the meaning of the Apollo program and how it forever altered American society The Apollo missions marked the first time human beings left Earth's orbit and visited another world and thus they loom large in our collective memory Many have detailed the exciting events of the Apollo program but Launius offers unique insight into its legacy as seen through multiple perspectives He surveys a wide range of viewpoints and narratives both positive and negative surrounding the program These include the argument that Apollo epitomizes American technological and political progress technological and scientific advances garnered from the program critiques from both sides of the political spectrum about the program's expenses and even conspiracy theories and denials of the program's very existence Throughout the book Launius weaves in stories from important moments in Apollo's history to draw readers into his analysis Apollo's Legacy is a must read for space buffs interested in new angles on a beloved cultural moment and those seeking a historic perspective on the Apollo program Shuttles and Space Missions Giles Sparrow,Judith John,Chris McNab,2015-12-15 Shuttles and Space Missions examines topics on space exploration from early orbital missions to the first astronauts on the moon Detailed illustrations and clear charts help explain these complicated topics **The Moon's Galactic History** Constance Victoria Briggs,2022-10-28 The Moon's Galactic History A Look at the Moon's Extraterrestrial Past and Its Connection to Earth follows the past and present research about the Moon's strange enigmatic history with a focus on an extraterrestrial presence The book examines such questions as Are there Moon inhabitants Are the UFOs seen today connected to the Moon Is there a city on the Moon and more Additionally Briggs

discusses things observed on the Moon including anomalous strange lights unidentified flying objects odd constructions artifacts symbols and more This book examines new thoughts and ideas from researchers and what their ideas are today about the extraterrestrial Moon Earth connection and what it means for us With all the information on unidentified flying objects in the news today it is time to have an updated book with current research that investigates both the past and present material on the Moon Did you know that Several of the NASA astronauts reported seeing UFOs while traveling to the Moon the Moon might be hollow Apollo 10 astronauts heard strange space music when traveling on the far side of the Moon mysterious anomalous activity has been seen on the Moon for centuries there are said to be ruins of structures on the Moon and more
