Calendars in Antiquity Sacha Stern,2012-09-06 Calendars were at the heart of ancient culture and society and were far more than just technical time keeping devices Calendars in Antiquity offers a comprehensive study of the calendars of ancient Mesopotamia Egypt Persia Greece Rome Gaul and all other parts of the Mediterranean and the Near East from the origins up to and including Jewish and Christian calendars in late Antiquity In this volume Stern sheds light on the political context in which ancient calendars were designed and managed Set and controlled by political rulers calendars served as expressions of political power as mechanisms of social control and sometimes as assertions of political independence or even of sub culture and dissidence While ancient calendars varied widely they all shared a common history evolving on the whole from flexible lunar calendars to fixed solar schemes The Egyptian calendar played an important role in this process leading most notably to the institution of the Julian calendar in Rome the forerunner of our modern Gregorian calendar Stern argues that this common evolutionary trajectory was not the result of scientific or technical progress It was rather the result of major political and social changes that transformed the ancient world with the formation of the great Near Eastern empires and then the Hellenistic and Roman Empires from the first millennium BC to late Antiquity The institution of standard fixed calendars served the administrative needs of these great empires but also contributed to their cultural cohesion

Moons Square Wall Calendar 2006 BrownTrout Publishers, Incorporated, 2005-08 **Calendars and Years** John M. Steele, 2007 Dates form the backbone of written history. But where do these dates come from? Many different calendars were used in the ancient world. Some of these calendars were based upon observations or calculations of regular astronomical phenomena such as the first sighting of the new moon crescent that defined the beginning of the month in many calendars while others incorporated schematic simplifications of these phenomena such as the 360 day year used in early Mesopotamian administrative practices in order to simplify accounting procedures. Historians frequently use handbooks and tables for converting dates in ancient calendars into the familiar BC AD calendar that we use today. But very few historians understand how these tables have come about or what assumptions have been made in their construction. The seven papers in this volume provide an answer to the question what do we know about the operation of calendars in the ancient world and just as importantly how do we know it? Topics covered include the ancient and modern history of the Egyptian 365 day calendar astronomical and administrative calendars in ancient Mesopotamia and the development of astronomical calendars in ancient Greece. This book will be of interest to ancient historians historians of science astronomers who use early astronomical records and anyone with an interest in calendars and their development **The Old Farmer's Almanac 2006**
