## **Moral Decision Making:**

Improving Moral Decision-making Michael Shute, William Zanardi, 2006      Ethical Leadership Aidan

McQuade, 2022-06-06 Ethical leadership does not simply emerge from a code of conduct a good school or a host of good intentions It is an individual choice or rather a series of choices that emerges from the complex interaction of personal values with social imperatives This book explores how and why some people become ethical leaders in morally challenging and complex social environments In Ethical Leadership Aidan McQuade provides insight into the concept of human agency the individual's choice of a course of action in response to the options posed by that individual's engagement with the social world He puts forth a new model of human agency the cruciform of agency which recognises that the potential range of individual action emerges from the nature of the resonance that social options strike with personal thoughts Every action adds to the individual's personal biography in ways that influence subsequent choices by confirming or changing personal values and hopes hence influencing the way the individual subsequently thinks about the world In explaining the potential and limits of human agency for ethical leadership the book establishes a basis for executives policy makers and academics to conceptualise and develop more robust and realistic approaches for the mitigation of some of the most pressing moral issues facing humanity today These include the inter related challenges of modern slavery and global warming which pose such critical threats to the Earth itself In this book McQuade not only sets an agenda for action but empowers individual leaders to find the moral courage to better advance human rights and preserve the environment even when such action requires unpopular choices Events around the book Link to a De Gruyter Online Event in which the author and independent human rights consultant Aidan McQuade together with Bernd Vogel Director of the Henley Centre for Leadership at Henley Business School Joanne Murphy Director of Research Ambassador Luis C deBaca Professor from Practice University of Michigan Law School discuss topics such as what potentially deters leaders from making ethical decisions what can they draw upon both internally and externally to do the right thing when doing so may be unpopular how in the light of fake news can leaders communicate ethically and much more <https://youtu.be/EYAAGiCX4cI>      **Moral Imagination and Management**

**Decision-making** Patricia Hogue Werhane, 1999 Why do good people do ethically questionable things Why do reputable businesses ignore the harmful consequences of their actions These questions continue to challenge philosophers legal scholars and corporate leaders In this pathbreaking book Patricia Werhane sets forth a model that explains ethical failings in business and shows how to transcend them Deleterious corporate actions are often attributed to simple greed and regulations have traditionally been enacted to counter them But Werhane argues that most corporate managers are not without moral sensibilities nor are they motivated primarily by greed or self interest Indeed companies themselves often attempt to improve ethical behavior most American companies today have values statements and ethics training is widespread but applying moral principles to practical decision making has not been entirely successful What is missing

according to Werhane is a highly developed moral imagination that enables managers and the companies they run to be aware of evaluate and change the mental models that often constrict business behavior The development of moral imagination is not identified merely with increased sensitivity to the existence of ethical issues in business It includes awareness of the mind sets that govern managerial and corporate decision making the development of reasoning skills to evaluate and moderate these mind sets and creativity to ponder viable alternative solutions to what appear to be insoluble economic dilemmas Unique in its sophisticated application of ethical reasoning to real day to day business problems this book points the way to the exemplary moral leadership that will enable companies to flourish in the complex global economies of the twenty first century The Art of Moral Decision Making Ambikey Mishra,2024-11-09 Why do we make the choices we do What influences our moral decisions in an ever changing world These questions lie at the heart of our daily existence In The Art of Moral Decision Making we peel back the layers of human behavior to uncover the intricate web of factors that shape our ethical compass Drawing on a rich tapestry of philosophical wisdom and cutting edge psychological research this book navigates the complex landscape of decision making with precision and insight From the ethics of everyday life to the grand dilemmas of our time this book offers a guiding light through the ethical maze enhancing your ability to make informed and principled decisions With The Art of Moral Decision Making you will embark on a profound transformation Whether you are a seeker of wisdom a student of ethics or someone seeking to live a more morally aware life this book equips you with the tools and knowledge to rise to the challenge of our rapidly evolving world **Life and Death Decisions in the Clinical Setting** Paul Walker,Terence Lovat,2017-03-20 This book moves away from the frameworks that have traditionally guided ethical decision making in the Western clinical setting towards an inclusive non coercive and reflective dialogic approach to moral decision making Inspired in part by J rgen Habermas s discourse theory of morality and principles of communicative action the book offers a proportionist approach as a way of balancing out the wisdom in traditional frameworks set in the actual reality of the clinical situation at hand Putting this approach into practice requires having a conversation a dialogue or a discourse with collaboration amongst all the stakeholders The aim of the dialogue is to reach consensus in the decision via mutual understanding of the values held by the patient and others whom they see as significant This book aims to underscore the moral philosophical foundations for having a meaningful conversation Life and Death Decision in the Clinical Setting is especially relevant in our contemporary era characterised medically by an ever increasing armamentarium of life sustaining technology but also by increasing multiculturalism a multiplicity of faiths and increasing value pluralism **In Good Conscience** Sidney Cornelia Callahan,1991 Being Apart from Reasons Cláudio Jr. Michelon,2006-04-23 Being Apart from Reasons deals with the question of how we should go about using reasons to decide what to do More particularly the book presents objections to the most common response given by contemporary legal and political theorists to the moral complexity of decision making in modern societies namely the attempt to release public

agents from their argumentative burden by insulating a particular set of reasons from the general pool of reasons and assigning the former systematic priority over all other reasons That strategy is apparent both in Rawls claim that reasons concerning the right are systematically prior to reasons concerning the good and in Raz s claim that pre emptive reasons are systematically prior to first order reasons The same strategy is also instantiated by certain arguments for the procedural value of law such as Jeremy Waldron s In the book each of those arguments for the insulation of reasons is objected to in order to defend the thesis the reasoning by public agents must always be as comprehensive as possible The remaining chapters object to those arguments mentioned above which aim at justifying the exclusion of certain reasons from public agents decision making      [Ethics for Public Safety](#) Carl Lofthouse, Morgan Peterson, 2014-12-03 [Ethics for Public Safety](#)
