The Ethics of Creativity S. Moran, D. Cropley, J.

Kaufman, 2014-03-28 The Ethics of Creativity illuminates the thorny issues that arise when novel creative ideas collide with what we believe to be right or good. This book tackles questions of when creativity and ethics tend to coincide and when conflict and how both might be harnessed to support a brighter future for all.

Moral Creativity John Wall, 2005-08-11 In Moral Creativity John Wall argues that moral life and thought are inherently and radically creative. Human beings are called by their own primordially created depths to exceed historical evil and tragedy through the ongoing creative transformation of their world. This thesis challenges ancient Greek and biblical separations of ethics and poetic image making as well as contemporary conceptions of moral life as grounded in abstract principles or preconstituted traditions. Taking as his point of departure the poetics of the will of Paul Ricoeur and ranging widely into critical conversations with Continental narrative feminist and liberationist ethics, Wall uncovers the profound senses in which moral practice and thought involve tension, catharsis, excess, and renewal. In the process, he draws new connections between sin and tragedy, practice and poetics, and morality and myth. Rather than proposing a complete ethics, Moral Creativity is a meta-ethical work investigating the creative capability as part of what it means morally to be human. This capability is explored around four dimensions of ontology: teleology, deontology, and social practice. In each case, Wall examines a traditional perspective on the relation of ethics to poetics, critiques it using resources from contemporary phenomenology, and develops a conception of a more original poetics of moral life. In the end, moral creativity is a human capability for inhabiting tensions among others and in social systems and in the image of a Creator creating together an ever more radically inclusive moral world.

The Ethics of Creativity Brian G. Henning, 2011-12-09 Foreword by Daniel A. Dombrowski. A central concern of nearly every environmental ethic is its desire to extend the scope of direct moral concern beyond human beings to plants, nonhuman animals, and the systems of which they are a part. Although nearly all environmental philosophies have long since rejected modernity's conception of individuals as isolated and independent substances, few have replaced this worldview with an alternative that is adequate to the organic, processive world in which we find ourselves. In this context, Brian G. Henning argues that the often overlooked work of Alfred North Whitehead has the potential to make a significant contribution to environmental ethics. Additionally inspired by classical American philosophers such as William James, John Dewey, and Charles Sanders Pierce, and environmental philosophers such as Aldo Leopold, Peter Singer, Albert Schweitzer, and Arne Naess, Henning develops an ethical theory of which the seminal insight is called The Ethics of Creativity. By systematically examining and developing a conception of individuality that is equally at home with the microscopic world of subatomic events and the macroscopic world of ecosystems, The Ethics of Creativity correctly emphasizes the well-being of wholes while not losing sight of the importance of the unique centers of value that constitute these wholes. In this way, The Ethics of Creativity has the potential to be a unique
