Educating Moral Sensibilities in Urban Schools, 2019-02-11 Nowadays schools face the challenge of creating pedagogical environments that are sensitive to numerous individual backgrounds in order to support students social and academic success. Urban schools are communities with rich possibilities to learn how to think, feel, and act morally. In this task principals, teachers, parents, and students of the schools each have their own voice. All these voices have to be heard in order to build communities with moral sensibilities. This book brings together recent work by international researchers from nine countries in the fields of moral development and citizenship education. The book consists of twelve chapters and it is divided into three parts. While the first part deals with the voices of urban school educators, the second part contains chapters with the focus on students. The third part is about curriculum programs and practices in schools that contribute to the education of moral sensibilities in the school communities. This book can be used as a textbook in moral and citizenship education or as an updated research report on international research on moral sensibilities

The Ethical Teacher Campbell, Elizabeth, 2003-09-01 This text combines teachers' beliefs and practices with a discussion of the connections between the moral dimensions of schooling and professional ethics applied in teaching. It presents the concept of ethical knowledge as it is revealed as it is challenged and as it may be used in schools. **Portrait of a Moral Agent Teacher** Gillian R. Rosenberg, 2015-06-05 Teaching morally and teaching morality are understood as mutually dependent processes necessary for providing moral education or the communication of messages and lessons on what is right, good, and virtuous in a student's character. This comprehensive and contextualized volume offers anecdotes and experiences on how an elementary schoolteacher envisions, enacts, and reflects on the ethical teaching and learning of her students. By employing a personally developed form of moral education that is not defined by any particular philosophical or theoretical orientation, this volume relates that classroom based moral education can therefore be conceived of and promoted as moral agency. Accentuated by the teacher's voice to offer the experience of being in the classroom, this volume enables others to transfer relevant practices to their own teaching contexts. **New Teaching and Teacher Issues** Mary B.
