## **Morality In The Making:**

Morality in the Making Roy Edwin Whitney,1929      **Morality in the Making** Helen Weinreich Haste,Don Locke,1993

**Morality in the Making** Roy E. Whitney,2013-10 This is a new release of the original 1929 edition      **Morality in the Making** Roy E. Whitney,2008-06-01 This scarce antiquarian book is a facsimile reprint of the original Due to its age it may contain imperfections such as marks notations marginalia and flawed pages Because we believe this work is culturally important we have made it available as part of our commitment for protecting preserving and promoting the world s literature in affordable high quality modern editions that are true to the original work      Making Men Moral Robert P. George,1995-04-06 Contemporary liberal thinkers commonly suppose that there is something in principle unjust about the legal prohibition of putatively victimless immoralities Against the prevailing liberal view Robert P George defends the proposition that moral laws can play a legitimate if subsidiary role in preserving the moral ecology of the cultural environment in which people make the morally significant choices by which they form their characters and influence for good or ill the moral lives of others George shows that a defence of morals legislation is fully compatible with a pluralistic perfectionist political theory of civil liberties and public morality      *Moral Imagination and Management Decision-making* Patricia Hogue Werhane,1999 Why do good people do ethically questionable things Why do reputable businesses ignore the harmful consequences of their actions These questions continue to challenge philosophers legal scholars and corporate leaders In this pathbreaking book Patricia Werhane sets forth a model that explains ethical failings in business and shows how to transcend them Deleterious corporate actions are often attributed to simple greed and regulations have traditionally been enacted to counter them But Werhane argues that most corporate managers are not without moral sensibilities nor are they motivated primarily by greed or self interest Indeed companies themselves often attempt to improve ethical behavior most American companies today have values statements and ethics training is widespread but applying moral principles to practical decision making has not been entirely successful What is missing according to Werhane is a highly developed moral imagination that enables managers and the companies they run to be aware of evaluate and change the mental models that often constrict business behavior The development of moral imagination is not identified merely with increased sensitivity to the existence of ethical issues in business It includes awareness of the mind sets that govern managerial and corporate decision making the development of reasoning skills to evaluate and moderate these mind sets and creativity to ponder viable alternative solutions to what appear to be insoluble economic dilemmas Unique in its sophisticated application of ethical reasoning to real day to day business problems this book points the way to the exemplary moral leadership that will enable companies to flourish in the complex global economies of the twenty first century      *Making Morality Work* Holly M. Smith,2018 What should we do if we cannot figure what morality requires of us Holly M Smith argues that the best moral codes solve this problem by offering two tiers one of which tells us what makes acts right and wrong and the other of which

provides user friendly decision guides She opens a path towards resolving a deep problem of moral life      *Metropolitan Pulpit and Homiletic Monthly* ,1929      Deconstructing Feminist Psychology Erica Burman,1998-01-12 How close is feminist psychology to contemporary feminism How can feminist psychological practice address issues of difference between women in meaningful ways What price has feminist psychology had to pay for attempting to engage with mainstream psychology to revise and improve it This book critiques feminist practice within psychology and reflects the diversity from across the globe of feminist struggles around psychology An international group of key feminist psychologists explore the relations between feminist politics and psychological practices in transitional and postcolonial contexts the distinct European traditions of critical psychology and women s studies and psychology s colonial centre in the United      **Ethics Across the Curriculum—Pedagogical Perspectives** Elaine E. Englehardt,Michael S. Pritchard,2018-05-08 This book features articles by more than twenty experienced teachers of ethics who are committed to the idea that ethics can and should be taught virtually anywhere in the education curriculum They explore a variety of ways in which this might best be done Traditionally confined largely to programs in philosophy and religion the teaching of ethics has in recent decades spread across the curriculum education The contributors to this book discuss the rationale for supporting such efforts the variety of challenges these efforts face and the sorts of benefits faculty and students who participate in ethics across the curriculum endeavors can expect An overriding theme of this book is that the teaching of ethics should not be restricted to one or two courses in philosophy or religion programs but rather be addressed wherever relevant anywhere in the curriculum For example accredited engineering programs are expected to ensure that their students are introduced to the ethical dimensions of engineering This can involve consideration of ethical issues within particular areas of engineering e g civil mechanical electrical chemical as distinctive segments of certain courses e g those that focus on design problems or as a full semester course in ethics in engineering Similar approaches can be taken in nursing medicine law social work psychology accountancy management and so on That is some emphasis on ethics can be expected to be found in broad range of academic disciplines However many ethical issues require careful attention from the perspectives of several disciplines at once and in ways that require their joining hands Recognizing that adequately addressing many ethical issues may require the inclusion of perspectives from a variety of disciplines makes apparent the need for effective communication and reflection across disciplines not simply within them This in turn suggests that faculty and their students can benefit from special programs that are designed to include participants from a variety of disciplines Such programs will be a central feature of this book Although some differences might arise in how such issues might best be discussed across different parts of the curriculum these discussions might be joined in ways that help students faculty administrators and the wider public better appreciate their shared ethical ground      **Moral Personhood** G. E. Scott,1990-07-05 This book presents a theory of personhood and moral personhood using results from recent work on intentionality in the philosophy of mind An account of intentional kinds

causation and explanation is provided to resolve some current issues in moral and legal theory and to examine questions raised in law and medicine where it is necessary to deal with human individuals at the boundaries of their lives Topics discussed include abortion death euthanasia personal identity rights including the right to privacy and the right to die servility and suicide     The State and Sexual Morality Association for Moral and Social Hygiene,1920     The Ethics of Hegel Georg Wilhelm Friedrich Hegel,1893     Science and Social Progress Herbert Wallace Schneider,1920     *God and Moral Obligation* C. Stephen Evans,2013-02-28 C Stephen Evans defends the claim that moral obligations are best understood as divine commands or requirements hence an important part of morality depends on God God s requirements are communicated in a variety of ways including conscience and that natural law ethics and virtue ethics provide complementary perspectives to this view     Theoretical Issues in Psychology International Society for Theoretical Psychology. Conference,2001-05-31 This eighth volume of the proceedings of the biennial conference of the International Society for Theoretical Psychology continues the Society s exploration of issues in the sciences of the mind Covered topics include narrative studies language and discourse perspectives on cultural psychology identity and subjectivity critical history and post modern debates about constructivism vs realism In short the papers included in this volume present a concise summation of the state of theoretical psychology     **Concepts of Self and Morality** Judith G. Smetana,1982     Making Amends Linda Radzik,2011-04-07 It is often assumed that wrongdoing can only be resolved through punishment or forgiveness But this book explores the responses that wrongdoers can and should make to their own misdeeds responses such as apology repentance reparations and self punishment It examines the possibility of atonement in a broad spectrum of contexts from cases of relatively minor wrongs in personal relationships to crimes to the historical injustices of our political and religious communities It argues that wrongdoers often have the ability to earn redemption within the moral community that respect and trust among victims communities and wrongdoers can be rebuilt and that the moral responsibility of wrongdoing groups can be addressed without treating their members unfairly     *The Scientific Basis of Morality* George Gore,1899     **Communication and Media Ethics** Patrick Lee Plaisance,2018-09-10 Ethics in communication and media has arguably reached a pivotal stage of maturity in the last decade moving from disparate lines of inquiry to a theory driven interdisciplinary field presenting normative frameworks and philosophical explications for communicative practices The intent of this volume is to present this maturation to reflect the vibrant state of ethics theorizing and to illuminate promising pathways for future research
