[Diagnosing Contemporary Philosophy with the Matrix Movies](#) O. Bradley Bassler,2016-12-14 This book charts the shape of future philosophical investigation by posing the question What is the Matrix Guided by the example of the Matrix film trilogy the author examines issues ranging from simulation proof and action to value culture and mythology offering a progressively deeper diagnosis of modern philosophical conditions In contrast to the contemporary focus upon cognitive science and a commitment to the distinction between appearance and reality this book helps readers to explore the argument that such abstractions are inevitably displaced by a more concrete distinction between dreaming and waking with the Matrix as the real and only world we inhabit Researchers and scholars will find this work an engaging and enlightening examination of reality via the medium of popular culture and film

Handbook of Hyper-real Religions ,2012-03-28 Today a new trend is clearly discernable that of hyper real religions These are innovative religions and spiritualities that mix elements of religious traditions with popular culture If we imagine a spectrum of intensity of the merging of popular culture with religion we might find at one end groups practicing Jediism appropriated from the Star Wars movies Matrixism from the Matrix trilogy and neo pagan rites based on stories from The Lord of the Rings and the Harry Potter series At the other end of the spectrum members of mainstream religions such as Christianity can be influenced or inspired by for example The Da Vinci Code Through various case studies this book studies the on and off line religious spiritual consumption of these narratives through a social scientific approach

Bradley Bassler,2022-09-26 Many philosophical accounts of reason are geared toward providing rational justifications ex post facto rather than accounting for the role reason plays in actu in the process of creative work Moreover when in actu accounts of reason are given they are usually too narrow to describe the sort of high level creative work that is involved in the composition of poetry or the creation of a scientific theory This book suggests that the rudiments of a broader account are found in various German Idealist figures most notably the philosopher novelist critic Friedrich Schlegel and the philosophical poet and novelist Friedrich Hlderlin However German Idealism generally is subject to Hans Blumenberg s secularization critique which provides a strong *prima facie* argument that the accounts of poetic reason suggested by Schlegel and Hlderlin are indefensible This book argues that confronting Blumenberg s secularization critique and his associated legitimization of modernity with a romantic conception of poetic reason requires revisions on both sides and that the work of Lacan is especially well suited to provide the conditions upon which a legitimization of poetic reason can be provided Journal of Philosophical Studies ,1928 Includes section New books Technologized Desire David
