

PARADOX

DEFINITION

A paradox is a statement or concept that seems self-contradictory or logically unacceptable, yet might possess an underlying truth. It often highlights inconsistencies within accepted beliefs, revealing that our understanding of reality is incomplete or nuanced.

EXAMPLES

- **The Liar Paradox:** "This statement is false." If the statement is true, then it must be false as stated, but if it is false, then it must be true.
- **Sorites Paradox:** If you remove one grain of sand from a heap, you still have a heap. If you keep removing single grains, when is it no longer a heap?
