particularly those of birch bark were among the most highly developed of manually propelled primitive watercraft Built with Stone Age tools from materials available in the areas of their use their design size and appearance were varied so as to create boats suitable to the many and different requirements of their users The great skill exhibited in their design and construction shows that a long period of development must have taken place before they became known to white men The Indian bark canoes were most efficient watercraft for use in forest travel they were capable of being propelled easily with a single bladed paddle This allowed the paddler unlike the oarsman to face the direction of travel a necessity in obstructed or shoal waters and in fast moving streams The canoes being light could be carried overland for long distances even where trails were rough or nonexistent Yet they could carry heavy loads in shallow water and could be repaired in the forest without special tools Bark canoes were designed for various conditions some for use in rapid streams some for quiet waters some for the open waters of lakes some for use along the coast Most were intended for portage in overland transportation as well They were built in a variety of sizes from small one man hunting and fishing canoes to canoes large enough to carry a ton of cargo and a crew or a war party or one or more families moving to new habitations Some canoes were designed so that they could be used turned bottom up for shelter ashore Tinket's Canoe Roland Bianchi,2015-09-10 Tinket's Canoe is a fictional story about an Indian youth of the Cayugas tribe who travels West in his birch bark canoe He discovers many other tribes and their lore in the late 1800 s Canoe Boys and Campfires William Murray Graydon,1907 **The Bark Canoes and Skin Boats of North America** Tappan Adney,Howard Irving Chapelle,Museum of History and Technology (U.S.),1964 The birch bark

canoes of the North American Indians were among the most advanced watercraft of their age. They could be used to carry heavy loads in shallow streams but were light enough to be hauled long distances over land. Built with Stone Age tools their design size and appearance varied to suit the requirements of their users. Upon arrival in North America European settlers began using the native made craft for traveling through the wilderness and many of today's modern canoes are based on these age old designs. Illustrated with black and white line drawings, diagrams and photos this fascinating guide explores the development of the canoes, their role in history, the materials and tools used to make them, their form and fabrication, regional differences in design and construction and more. Anyone interested in canoes or the skills of Native Americans will find this book as illuminating as it is important.
