Moral Issues in Mental Retardation Ronald S. Laura, Adrian F. Ashman, 2018-09-03 First published in 1985 Despite the vast number of books available on mental handicap there had been little published about moral philosophical or ethical issues Yet such issues must be faced and indeed answered either explicitly or implicitly before any system of education or care for mentally handicapped people can be put into practice This book reviews a number of issues in this field Key topics addressed include respect for retarded people the notion of equal rights terminating the lives of severely handicapped infants and genetic engineering With the current emphasis on recognising the rights and needs of the handicapped as individuals this book should represent an important review and be of interest to all concerned with mentally handicapped people

Ethics and Mental Retardation L.M. Kopelman, J.C. Moskop, 1984-02-29 This volume offers a collection of writings on ethical issues regarding retarded persons Because this important subject has been generally omitted from formal discussions of ethics there is a great deal which needs to be addressed in a theoretical and critical way Of course many people have been very concerned with practical matters concerning the care of retarded persons such as what liberties entitlements or advocacy they should have Interestingly because so much practical attention has been given to issues which are not discussed by ethical theorists they offer a rare opportunity to evaluate ethical theories themselves That is certain theories which appear convincing on other subjects seem implausible when they are applied to reasoned and compelling views we hold concerning retarded individuals Our subject then has both practical and conceptual dimensions More over because it is one where pertinent information comes from many sources contributors to this volume represent many fields including philosophy religion history law and medicine We regret that it was not possible to include more points of view like those of psychologists sociologists nurses and families There is however a good and longstanding literature on mental retardation from these perspectives **Handbook of Intellectual and Developmental Disabilities** John W. Jacobson, James A. Mulick, Johannes Rojahn, 2007-03-15 Changes within the interdisciplinary field of intellectual and developmental disabilities

A Transformatory Ethic of Inclusion Jayne Clapton, 2009-01-01 Inclusion is a topical notion which underpins contemporary human service practices and policies within Western Judeo Christian societies Inclusion is most often considered within socio historical and socio political contexts whereby technical and legislative responses are sought However this book explores the question How ethically defensible is the notion of inclusion in relation to people with intellectual disability The book contends that inclusion is a multifaceted complex concept in a dualistic and dichotomous relationship with exclusion It is argued that historical and contemporary conceptualisations of exclusion for people with intellectual disability have been constructed from various philosophical and theological matrices imbued with particular values about personhood Furthermore it is proposed that the ethical significance of inclusion and exclusion in the context of intellectual disability is defined and perpetuated by expressions of a particular socio symbolic order underpinned by patriarchy and kyriarchy and subjected to two controlling ethics an Ethic of Normalcy and an Ethic of Anomaly Inclusion and exclusion are conceived as phenomena relating to how membership is defined legitimated or repelled by concealed occluding boundaries acting within a patriarchal socio ethical fabric The book argues that Ethical Inclusion is only possible through the rupture of these boundaries by a conceptual tool A Transformatory Ethic of Inclusion This conceptual instrument

of rupture embraces the scholarship of feminist ethics and feminist theology Such a rupture requires examining the ways traditional ethical frameworks themselves have conceptually diminished and devalued the authenticity of people with intellectual disability A concept of integrality becomes imaginable Conceptual analysis is framed using a crafting metaphor of a patchwork quilt which is infused with narrative and by which such an ethical exploration is undertaken and impaired traditional ethical theorising is confronted and transformed

Mental Retardation and Sterilization Ruth Macklin, Willard Gaylin, 2013-03-13 1 This book is the product of a one year project conducted by the Hastings Center Institute of Society Ethics and the Life Sciences during 1976 1977 The Behavior Control Research Group an ongoing interdisciplinary working group composed of philosophers psychiatrists psychologists social scientists and lawyers met four times over the course of the year with special consultants with expertise in the field of mental retardation At those meetings participants gave in formal presentations which were followed by group discussion As the project progressed formal papers were delivered and subjected to further critical commentary This volume in two related parts represents the deliberations of the group as a whole and then offers individual papers prepared by some scholars in order to give a sense of the kind of specific arguments on which the general conclusions were based We undertook the project to examine 1 questions of competence and consent and 2 the practical implications

Moral Problems in Medicine Samuel Gorovitz,1976 This book is designed primarily to provide readings for a consideration of the moral issues in medicine from a philosophical point of view There are two basic alternatives in structuring a philosophical course in medical ethics One is to divide the course according to medically conceived topics such as organ transplantation genetic engineering euthanasie etc Such an approach is wholly viable but we have preferred no to adopt it here Rather we have organized the book primarily on the basis of more philosophically inspired categories Thus our headings invoke such notions of paternalism truth social justice etc

Care of the Mentally Retarded Marian Willard Blackwell, 1979 *Ethical Issues in Mental Health* Steve Baldwin, Philip J. Barker, 2013-11-11 Why write another book on ethics As practitioners we are involved both in the design and delivery of services to people with mental health problems In common with all other professionals our work has led to the experience of ethical dilemmas typically these have involved major confrontations either with our colleagues or our consciences This book however is not limited to a discussion of such major themes Rather we have tried to use a broader canvas ethics in our view is really about the judgement of right and wrong in ordinary everyday life Ethics are highly personal we fashion our own personal code from our experience of others and from the tests which bring meaning to our lives Such experiences shape our individual values We bring these codes and values to our work We are not always aware of their influence in our dealings with people Although we may not always be aware of it all our actions pose an ethical question Given that our work involves us in helping others to live ordinary satisfying lives this challenge heightens the intensity of our ethical dilemmas This is most evident where our personal code conflicts with the implicit code of the health setting
