Moral Paradoxes Of Nuclear Deterrence:

Moral Paradoxes of Nuclear Deterrence Gregory S. Kavka, 1987-10-30 This volume examines the complex and vitally important ethical questions connected with the deployment of nuclear weapons and their use as a deterrent A number of the essays contained here have already established themselves as penetrating and significant contributions to the debate on nuclear ethics They have been revised to bring out their unity and coherence and are integrated with new essays The books exceptional rigor and clarity make it valuable whether the reader's concern with nuclear ethics is professional or personal Part I explores the morality of nuclear deterrence from each of the two dominant traditions in moral philosophy deontology and consequentialism and points out a number of interesting ethical dilemmas Part II criticizes a variety of alternatives to deterrence unilateral nuclear disarmament world government strategic defense against ballistic missiles and nuclear coercion and argues for mutual nuclear disarmament as a realistic and desirable long run alternative **10 Moral**

Paradoxes Saul Smilansky, 2008-04-30 Presenting ten diverse and original moral paradoxes this cutting edge work of philosophical ethics makes a focused concrete case for the centrality of paradoxes within morality Explores what these paradoxes can teach us about morality and the human condition Considers a broad range of subjects from familiar topics to rarely posed questions among them Fortunate Misfortune Beneficial Retirement and Preferring Not To Have Been Born Asks whether the existence of moral paradox is a good or a bad thing Presents analytic moral philosophy in a provocative engaging and entertaining way posing new questions proposing possible solutions and challenging the reader to wrestle with the paradoxes themselves **Rational Commitment and Social Justice** Jules L. Coleman, Christopher W. Morris, Gregory

S. Kavka, 1998-11-13 Gregory S Kavka 1947-94 was a prominent and influential figure in contemporary moral and political philosophy The essays in this volume are concerned with fundamental issues of rational commitment and social justice to which Kavka devoted his work as a philosopher The essays take Kavka's work as a point of departure and seek to advance the respective debates The topics include the relationship between intention and moral action as part of which Kavka's famous toxin puzzle is a focus of discussion the nature of deterrence the rationality of moral contractarian ethics and the contemporary relevance of Hobbes political thought Incorporating important philosophical statements of problems and fresh contributions to the ongoing debate about rational intention this volume will interest not just philosophers but also political scientists and economists *The Decisionist Imagination* Daniel Bessner, Nicolas Guilhot, 2018-10-19 In the decades

following World War II the science of decision making moved from the periphery to the center of transatlantic thought The Decisionist Imagination explores how decisionism emerged from its origins in prewar political theory to become an object of intense social scientific inquiry in the new intellectual and institutional landscapes of the postwar era By bringing together scholars from a wide variety of disciplines this volume illuminates how theories of decision shaped numerous technological aspects of modern governance helping to explain in short how we arrived at where we are today *Prisoners of*

Reason S. M. Amadae, 2016-01-14 Using the theory of Prisoner's Dilemma Prisoners of Reason explores how neoliberalism departs from classic liberalism and how it rests on game theory Violence, Terrorism, and Justice Raymond Gillespie Frey, 1991-08-30 Papers from a conference held at Bowling Green State University in the fall of 1988 T p verso **The War That Must Not Occur** Jean-Pierre Dupuy, 2023-09-19 The possibility of a nuclear war that could destroy civilization has influenced the course of international affairs since 1945 suspended like a sword of Damocles above the heads of the world's leaders The fact that we have escaped a third world war involving strategic nuclear weapons indeed that no atomic weapon of limited power has yet been used under battlefield conditions seems nothing short of a miracle Revisiting debates on the effectiveness and ethics of nuclear deterrence Jean Pierre Dupuy is led to reformulate some of the most difficult questions in philosophy He develops a counterintuitive but powerful theory of apocalyptic prophecy once a major catastrophe appears to be possible one must assume that it will in fact occur Dupuy shows that the contradictions and paradoxes riddling discussions of deterrence arise from the tension between two opposite conceptions of time one in which the future depends on decisions and strategy and another in which every occurring event is one that could not have failed to occur Considering the immense destructive power of nuclear warheads and the almost unimaginable ruin they are bound to cause Dupuy reaches a provocative conclusion whether they bring about good or evil does not depend on the present or future intentions of those who are in a position to use them The mere possession of nuclear weapons is a moral abomination Energy Abstracts for Policy Analysis, 1988 Modality Matters Henrik Lagerlund, Sten Lindström, Rysiek Śliwiński, 2006 **Rationality, Morality, and Self-interest** John Heil, 1993 Distinguished philosophers address questions pertaining to the character of human reason and the relation of reason to action and belief *Contemporary Moral Problems* James E.
