

WHO HAS MORAL STATUS?

Moral Status

Russell DiSilvestro

Moral Status:

Moral Status Mary Anne Warren, 1997-11-13 Mary Anne Warren explores a theoretical question which lies at the heart of practical ethics: what are the criteria for having moral status? In other words, what are the criteria for being an entity towards which people have moral obligations? Some philosophers maintain that there is one intrinsic property for instance, life, sentience, humanity, or moral agency. Others believe that relational properties such as belonging to a human community are more important. In Part I of the book, Warren argues that no single property can serve as the sole criterion for moral status; instead, life, sentience, moral agency, and social and biotic relationships are all relevant, each in a different way. She presents seven basic principles, each focusing on a property that can in combination with others legitimately affect an agent's moral obligations towards entities of a given type. In Part II, these principles are applied in an examination of three controversial ethical issues: voluntary euthanasia, abortion. *Rethinking Moral Status* Steve Clarke, Hazem Zohny, Julian

Savulescu, 2021-08-05 Common sense morality implicitly assumes that reasonably clear distinctions can be drawn between the full moral status that is usually attributed to ordinary adult humans, the partial moral status attributed to non-human animals, and the absence of moral status which is usually ascribed to machines and other artifacts. These implicit assumptions have long been challenged and are now coming under further scrutiny as there are beings we have recently become able to create, as well as beings that we may soon be able to create, which blur the distinctions between human, non-human, animal, and non-biological beings. These beings include non-human chimeras, cyborgs, human brain organoids, post-humans, and human minds that have been uploaded into computers and onto the internet and artificial intelligence. It is far from clear what moral status we should attribute to any of these beings. There are a number of ways we could respond to the new challenges these technological developments raise: we might revise our ordinary assumptions about what is needed for a being to possess full moral status, or reject the assumption that there is a sharp distinction between full and partial moral status. This volume explores such responses and provides a forum for philosophical reflection about ordinary presuppositions and intuitions about moral status. *Moral Status and Human Life* James G. Dwyer, 2010-10-21 Are children of equal, lesser, or perhaps even greater moral importance than adults? This work of applied moral philosophy develops a comprehensive account of how adults as moral agents ascribe moral status to beings, ourselves and others, and on the basis of that account identifies multiple criteria for having moral status. It argues that proper application of those criteria should lead us to treat children as of greater moral importance than adults. This conclusion presents a basis for critiquing existing social practices, many of which implicitly presuppose that children occupy an inferior status, and for suggesting how government policy, law, and social life might be different if it reflected an assumption that children are actually of superior status. **The Moral Status of Animals** Stephen R. L. Clark, 1977 **The Moral Status of Children** Michael D. A. Freeman, 1997-08-28 1 The moral status of children *Life Without Degrees of Moral Status* David Wendler, 2023 Most people believe that animals

matter morally but human beings matter significantly more than animals This belief which is supported by important intuitions fundamentally shapes our lives It places us at the center of the moral universe and it explains why we put animals in cages conduct pain inducing experiments on them and eat them for dinner However the belief that there are degrees of moral status also raises the possibility that robots and genetically enhanced human beings could become significantly more important than the rest of us in which case they might be justified in putting us in cages experimenting on us and eating us for dinner Despite the importance of these issues there have been no systematic assessments of whether in fact there are degrees of moral status Are some individuals more important morally than others The goal of this book is to answer this vital question

Growing Moral Relations M. Coeckelbergh, 2012-07-10 New scientific and technological developments challenge us to reconsider our moral world order This book offers an original philosophical approach to this issue it makes a distinctive contribution to the development of a relational approach to moral status by re defining the problem in a social and phenomenological way

Human Capacities and Moral Status Russell DiSilvestro, 2010-04-21 Many debates about the moral status of things for example debates about the natural rights of human fetuses or nonhuman animals eventually migrate towards a discussion of the capacities of the things in question for example their capacities to feel pain think or love Yet the move towards capacities is often controversial if a human s capacities are the basis of its moral status how could a human having lesser capacities than you and I have the same serious moral status as you and I This book answers this question by arguing that if something is human it has a set of typical human capacities that if something has a set of typical human capacities it has serious moral status and thus all human beings have the same sort of serious moral status as you and I Beginning from what our common intuitions tell us about situations involving temporary incapacitation where a human organism has then loses then regains a certain capacity this book argues for substantive conclusions regarding human fetuses and embryos humans in a permanent vegetative state humans suffering from brain diseases and humans born with genetic disorders Since these conclusions must have some impact on our ongoing moral and political debates about the proper treatment of such humans this book will be useful to professionals and students in philosophy bioethics law medicine and public policy

The Moral Status of Persons Gerhold K. Becker, 2000 The advances in molecular biology and genetics medicine and neurosciences in ethology and environmental studies have put the concept of the person firmly on the philosophical agenda Whereas earlier times seemed to have a clear understanding about the moral implications of personhood and its boundaries today there is little consensus on such matters Whether a patient in the last stages of Alzheimer s disease is still a person or whether a human embryo is already a person are highly contentious issues This book tackles the issue of personhood and its moral implications head on The thirteen essays are representative of the major strands in the current bioethical debate and offer new insights into humanity s moral standing its foundations and its implications for social interaction While most of the essays approach the issue by drawing on the rich intellectual tradition of

the West others offer a cross cultural perspective and make available for ethical consideration the philosophical resources and the wisdom of the East The contributors to this book are highly recognized philosophers ethicists theologians and professionals in health care and medicine from East Asia China Japan Europe and North America The first part of the book probes the foundations of personhood Examining critically the main theories on personhood in contemporary philosophy the authors offer alternatives that better respond to contemporary challenges and their implications for bioethics The focus of the second part is firmly on the Confucian relational concept of the person and on the social constitution of personhood in traditional Japanese culture While the essays challenge the individualistic features of personhood in the Western tradition they lay the foundations for a richer concept that holds great promise for the resolution of moral dilemmas in modern medicine and health care The third part of the book enters into a dialogue with the Christian tradition and draws on its spiritual heritage in the search for answers to the contemporary challenges to human dignity and value Its focus is on the Catholic social thought and Lutheran theology The fourth part addresses the moral status of persons in view of specific issues such as the effects of brain injury gene therapy and human cloning on personhood It extends the scope of research beyond human beings and inquires also into the moral status of animals

Consciousness and Moral Status Joshua Shepherd, 2018-05-31 It seems obvious that phenomenally conscious experience is something of great value and that this value maps onto a range of important ethical issues For example claims about the value of life for those in Permanent Vegetative State PVS debates about treatment and study of disorders of consciousness controversies about end of life care for those with advanced dementia and arguments about the moral status of embryos fetuses and non human animals arguably turn on the moral significance of various facts about consciousness However though work has been done on the moral significance of elements of consciousness such as pain and pleasure little explicit attention has been devoted to the ethical significance of consciousness In this book Joshua Shepherd presents a systematic account of the value present within conscious experience This account emphasizes not only the nature of consciousness but also the importance of items within experience such as affect valence and the complex overall shape of particular valuable experiences Shepherd also relates this account to difficult cases involving non humans and humans with disorders of consciousness arguing that the value of consciousness influences and partially explains the degree of moral status a being possesses without fully determining it The upshot is a deeper understanding of both the moral importance of phenomenal consciousness and its relations to moral status This book will be of great interest to philosophers and students of ethics bioethics philosophy of psychology philosophy of mind and cognitive science

How Can We Be Equals? Giacomo Floris, Nikolas Kirby, 2024-07-04 That all human beings are one another's moral equals is taken by many to be the fundamental premise of contemporary moral political and legal theory It is also the demand of individuals and groups to be treated as equals that drives much of political practice and protest today However what does such a claim of basic equality between human beings mean How can it possibly be true

given that we are unequals in almost every other aspect of our lives And who exactly is meant to fall within its scope This volume brings together leading thinkers on basic equality to address these questions Collectively they explore the concept of equality in history and criticism analysing and presenting solutions to the most pressing challenges that have been raised against the principle

The Oxford Handbook of Global Justice Thom Brooks, 2020-02-27

Global justice is an exciting area of refreshing innovative new ideas for a changing world facing significant challenges Not only does work in this area often force us to rethink about ethics and political philosophy more generally but its insights contain seeds of hope for addressing some of the greatest global problems facing humanity today The Oxford Handbook of Global Justice has been selective in bringing together some of the most pressing topics and issues in global justice as understood by the leading voices from both established and rising stars across twenty five new chapters This Handbook explores severe poverty climate change egalitarianism global citizenship human rights immigration territorial rights and much more

Global food security: ethical and legal challenges Carlos M. Romeo Casabona, Leire Escajedo San Epifanio, Aitziber Emaldi Cirión, 2023-09-04

Food security will exist when all people at all times have physical and economic access to sufficient safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life as stated in the Rome Declaration in 1996 Given the dimension of the current global food crisis food security means adopting effective and specific actions at individual household national regional and global levels Food security invites us to reflect upon ethical principles like human equity justice between current and future generations respect for human dignity and sustainable food production We strive to maintain our basic ethical convictions and engage in societal debates about other important values While we do this we may have to change our ways of life and learn to create new priorities in the face of global responsibility Science and technology are key tools to reach the Millenium Goals providing both society and decision makers alike with relevant information and new options within an ethical framework The contributions found in this

publication bring together the perspectives of a diverse group of authors Coming from the academic world the public sector and non governmental organisations NGOs they provide the latest views on Global food security ethical and legal challenges

The Virtues of Vengeance Peter A. French,2001 In the course of his study of vengeance as a moral concept French exposes important distinctions between types of moral theories karmic and non karmic and between people who are morally handicapped and those who are morally challenged He examines concepts relevant to vengeance such as honor moral authority and evil and issues such as the rationality of revenge and proportionality in punishment **BOOK JACKET**

Moral Status: A Political Approach Hailey Elizabeth Huget,2020 In this dissertation I develop a political approach to the subject of moral status While much of the moral status literature focuses on questions of individual morality like whether I may permissibly eat meat for dinner or hunt animals for sport my approach focuses upon a set of largely neglected moral status questions that arise within the realm of institutional morality For example are domesticated animals entitled to the social provision of food water shelter and healthcare What about human beings with severe cognitive disabilities or who are in irreversible comas Should we allocate resources to protect non human animals from crime and natural disasters as we do for human beings To answer these questions I develop an account of which creatures can make moral claims upon social and political institutions to protection and provision

Questions on Natural Science and the Harmonic Philosophy John Emmett Richardson,1913

The Moral Status of Combatants Michael Skerker,2020-06-04 This book develops a new contractualist foundation for just war theory which defends the traditional view of the moral equality of combatants and associated egalitarian moral norms Traditionally it has been viewed that combatants on both sides of a war have the same right to fight irrespective of the justice of their cause and both sides must observe the same restrictions on the use of force especially prohibitions on targeting noncombatants Revisionist philosophers have argued that combatants on the unjust side of a war have no right to fight that pro war civilians on the unjust side might be targetable and that lawful combatants on the unjust side might in principle be liable to prosecution for their participation on the unjust side This book seeks to undercut the revisionist project and defend the traditional view of the moral equality of combatants It does so by showing how revisionist philosophers fail to build a strong foundation for their arguments and misunderstand that there is a moral difference between collective military violence and a collection of individually unjustified violent actions Finally the book develops a theory defending the traditional view of military ethics based on a universal duty of all people to support just institutions This book will be of much interest to students of just war theory ethics philosophy and war studies
