Textbook of Community Mental Health Graham Thornicroft, Robert E. Drake, Oye Gureje, Kim T. Mueser, George Szmukler, 2025-01-03 Community mental health has evolved as a field of practice and as a research discipline during the last 50 years Now newer concepts such as shared decision making the recovery approach evidence based practice implementation science telemedicine and mobile device technology are adding layers of texture to this domain These developments require an ever more sophisticated understanding of the very latest evidence and experience in community mental health care to respond to the values goals needs and preferences of people with lived experience of mental health conditions This second edition of the Oxford Textbook of Community Mental Health addresses recent changes and achievements current controversies and future challenges while emphasizing areas of convergence where social values health medical sciences and policy formation converge and meet This edition also features a new section on global mental health to emphasise what is known about the mental health gap in low and middle income countries and the evidence of how to respond to these huge global challenges Like community mental health care itself the authors are multidisciplinary international and bring both clinical and scientific perspectives to this volume This textbook will be an invaluable and authoritative source of reference for all mental health specialists for people with mental health conditions for staff in non governmental and governmental organisations and indeed for all who are dedicated to creating better mental health services and systems **Assertive Community Treatment** Sandra J. Johnson, 2011-12-31 The twenty first century has witnessed an

explosion in studies on comparative health studies but mental health remains virtually ignored Unlike the well researched topic of health policy there is a gap in the marketplace covering mental health policy and health care policymaking This book fills that gap it is a comparative analysis of the implementation of Assertive Community Treatment ACT an evidence based practice employed in two states that promises to empower the well being of individuals suffering from mental illness Assertive Community Treatment specifically examines the tension separating the notion of client recovery and evidence based programs Johnson challenges the assumption that practitioners should rely on evidence based practices to close the gap between scientific knowledge and practice She argues that in an era of managed care this encourages state mental health administrators to adopt policies that are overly focused on outcomes Programs that can measure the outcomes of care provided and evidence based practices have become central aspects of the quality care agenda This study traces the role of policy entrepreneurs throughout the Assertive Community Treatment policymaking process By differentiating mental health in general qualitative research increases the chances of observing similarities and differences in outcomes Johnson explains why the ACT model was adopted and implemented She concludes that there is a clear monopoly by medical researchers and scientists within Assertive Community Treatment research and as a result too much emphasis is placed on the roles of policy entrepreneurs as the main innovators in the agenda and policy formulation stages Johnson presents a strong argument for more innovation in the implementation stage
