More Europe:

Imagining Europe: Towards a More United and Effective EU Nathalie Tocci ,2014-06-01 As the unprecedented economic and political crises push Europe to the brink a critical question arises as to what the foreseeable trajectories affecting EU governance and policy are in the decades ahead This volume delineates what model of governance the EU could head towards and which of these models is best suited for the purpose of a more united and effective Union **China and Europe's Partnership for a More Sustainable World** Francesca Spigarelli,Louise Curran,Alessia Arteconi,2016-07-26 This book gathers the main scientific outputs of POREEN a four year project on partnering opportunities between Europe and China in the renewable energy and environmental industries It investigates the main challenges and opportunities related to Sino European dialogue and cooperation in the green sector with a focus on sustainable growth **Europe's Malaise** Francesco Duina,Frédéric Merand,2020-10-07 Europe is struggling Its challenges include weak economic growth demographic trends that undermine the sustainability of social and other programs migration Brexit the unfinished euro architecture and much more This volume of Research in Political Sociology seeks to adopt a longer view to make sense of Europe s current malaise *Explaining European Identity Formation* Stephanie Bergbauer,2017-10-24 What makes people identify with Europe To answer this question this book analyzes the development and determinants of a common European identity among EU citizens from the Maastricht Treaty in 1992 to the recent financial and economic crisis The author examines citizens identification with Europe for all EU member states and systematically explores the theoretical and empirical implications of two turning points in the recent history of EU integration namely the EU s enlargement to Central and Eastern Europe in 2004 2007 and the financial and economic crisis that started in 2008 The book integrates theoretical approaches to European identity in sociology social psychology and EU public opinion research in a comprehensive model for explaining individual identification with Europe The empirical analysis employs a multilevel framework to systematically assess the influence of individual characteristics and the political economic and social context on citizens feelings of identity The long analysis period spanning from 1992 to the present allows inferences to be drawn about the long term developments in the sources of European identification as well as the immediate impact of EU enlargement and the crisis on the determinants of European identification European Research Reloaded: Cooperation and Integration among Europeanized States Ronald Holzhaacker,Markus Haverland,2006-09-01 The Three Waves of European Research European cooperation and integration has continued to progress forward over the past five decades with an ever deepening impact on the member states The first wave of research into these processes concerned European integration the process of institution building and policy developments at the European Union EU level The second wave on Europeanization used integration as an explanatory factor in understanding domestic political change and continuity related to the EU What is now necessary is to link our understanding of these bottom up and top down processes of integration and Europeanization in the EU This book argues

that a third wave of research on the EU is needed to adequately understand the increased interconnectedness between the European and national political levels We posit that this third wave should be sensitive to the temporal dimension of European integration and Europeanization In particular we seek to link the processes of European integration and Europeanization in a new way by asking the question how has Europeanization affected current modes of integration and cooperation in the EU Part I Europeanization of the Member States Preparing the ground for the third wave the first part of the book concerns Europeanization In order to fully understand the feedback of Europeanization on cooperation and integration it is important to analyze how European integration has had an impact on member states in the first place in particular indirectly beyond the direct mechanism of compliance with European policies *Spain* Richard Gillespie, Richard Youngs, 2013-09-27 This volume assesses the evolution of Spain's external relations during the 1990s within and beyond Europe and assesses the principal challenges facing the country at the beginning of the twenty first century The coincidence of several crucial global and European developments has had a profound effect on Spain Adjustment of the economy and changes in foreign policy perspectives have become unavoidable In turn Spain as an increasingly self confident member of the EU has itself become a significant actor in European level developments Spain's relationship with Europe and the wider world is increasingly balanced between new constraints and new opportunities for international influence Introduction to the Literature of Europe in the Fifteenth, Sixteenth, and Seventeenth Centuries Henry Hallam, 1880 **Modern Europe** Thomas Henry Dyer, 1877 **Europe and the World Since 1914** Ernest John Knapton, Thomas Kingston Derry, 1967 *The Communist Review*, 1923 Europe, 2006 Routledge Handbook of European Politics José Magone, 2014-12-17 Since the Treaty of the European Union was ratified in 1993 the European Union has become an important factor in an ever increasing number of regimes of pooled sovereignty This Handbook seeks to present a valuable guide to this new and unique system in the twenty first century allowing readers to obtain a better understanding of the emerging multilevel European governance system that links national polities to Europe and the global community Adopting a pan European approach this Handbook brings together the work of leading international academics to cover a wide range of topics such as the historical and theoretical background the political systems and institutions of both the EU and its individual member nations political parties and party systems political elites civil society and social movements in European politics the political economy of Europe public administration and policy making external policies of the EU This is an invaluable and comprehensive resource for students scholars researchers and practitioners of the European Union European politics and comparative politics *Eugenical News*, 1928 *LIFE*, 1953-08-10 LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century It now lives on at LIFE.com the largest most amazing collection of professional photography on the internet Users can browse search and view photos of today's people and events They have free access to share print and post images for personal use The Eclectic Magazine of Foreign Literature, Science, and Art, 1889 Annals of the American
