This paper indicates that the consequences of regional trade agreements for the world trade system may be deceiving an arrangement s apparent virtue may constitute the source of its drawback In a model where governments have political as well as economic motivations I show that a free trade area induces its members to reduce protection against the non members and to do so sufficiently deeply to generate overall trade creation Trade creation amplifies the excluded countries access to the integrating markets but also reduces their extra gains from multilateral liberalization Thus trade creation can reverse the support of the excluded countries to liberalization on a multilateral basis This is more likely to happen when governments outside the free trade area are more responsive to special interests [Contextual Dictionary of Chinese Cultural Knowledge](#) ,2025-09-23 This dictionary contains nearly 1500 entries and constitutes a core of essential knowledge on Chinese culture in a systematized and modernized form It offers a professional yet highly readable introduction to Chinese culture for a global academic audience Organized by subject and keyword the book is divided into six sections philosophy and ideology social governance literature and history art and aesthetics humanities and geography and artefacts and technology It contains both core knowledge and diversified information while covering both historical and contemporary aspects The target audience chiefly includes general readers of Chinese culture as well as sinologists and translators of Chinese books The dictionary provides the latest information on the full range of Chinese knowledge an accurate interpretation of Chinese culture a logically arranged and accessible reference framework and a panoramic experience across the breadth of the subject It enables readers to grasp the patterns of Chinese culture and its knowledge systems while also gaining a deeper understanding of contemporary Chinese life **Banking** ,1921 **Free Trade Agreements** William H.
