Mayan Factor Path Beyond Technology:

The Mayan Factor José Argüelles, 1987-04-01 Visionary historian Argüelles unravels the harmonic code of the ancient Maya providing valuable keys to understanding the next twenty years of human evolution *The New Age in the Modern West* Nicholas Campion, 2015-11-19 New Age culture is generally regarded as a modern manifestation of Western millenarianism a concept built around the expectation of an imminent historical crisis followed by the inauguration of a golden age which occupies a key place in the history of Western ideas The New Age in the Modern West argues that New Age culture is part of a family of ideas including utopianism which construct alternative futures and drive revolutionary change Nicholas Campion traces New Age ideas back to ancient cosmology and questions the concepts of the Enlightenment and the theory of progress He considers the contributions of the key figures of the 18th century the legacy of the astronomer Isaac Newton and the Swedish visionary Emanuel Swedenborg as well as the theosophist H P Blavatsky the psychologist C G Jung and the writer and artist Jose Argüelles He also pays particular attention to the beat writers of the 1950s the counterculture of the 1960s concepts of the Aquarian Age and prophecies of the end of the Maya Calendar in 2012 Lastly he examines neoconservatism as both a reaction against the 1960s and as a utopian phenomenon The New Age in the Modern West is an important book for anyone interested in countercultural and revolutionary ideas in the modern West *Beyond the End of the World - 2012 and apocalypse* Will Black, 2010-10 This book cuts through rampant misinformation circulating about 2012 to present a coherent understanding of the Mayan calendar and the significance of the date As an anthropologist and journalist Will Black has conducted research into 2012 millenarianism for several years He consequently offers a much broader and clearer picture than other books on the subject In their haste to jump onto the 2012 bandwagon most authors seem to have forgotten that the Maya are a real people often living in as violently precarious circumstances as their ancestors Will Black demolishes fantasies about crumbling calendar stones before examining the brutal cocaine wars blighting Central America The hedonistic world of many westerners who have become interested in 2012 is contrasted sharply with the lives of ancient and modern Maya The extraordinary world of shamans is contrasted with that of New Age seekers Information about key visionary substances is offered **Prophecy in the New Millennium** Suzanne Newcombe, Sarah Harvey, 2016-04-15 Secular and spiritual prophets of doom abound in the information rich twenty first century as they have for millennia But there has yet to be worldwide floods meteor impact global computer failure obvious alien contact or direct intervention from God to end the world as we know it Considering the frequency with which prophecy apparently fails why do prophecies continue to be made and what social functions do they serve This volume gives a concise but comprehensive overview of the rich diversity of prophecy its role in major world religions as well as in new religions and alternative spiritualities its social dynamics and its impact on individuals lives Academic analyses are complimented with contextualized primary source testimonies of those who live and have lived within a prophetic framework The book argues

that the key to understanding the more dramatic apocalyptic and millenarian aspects of prophecy is in appreciating prophecy's more mundane manifestations and its role in providing meaning and motivation in everyday life **Beyond 2012:**

Catastrophe or Awakening? Geoff Stray, 2009-05-21 An illustrated encyclopedic overview of the prophecies, calendars and theories that indicate the year 2012 is a threshold of great change for humanity. Looks at the scientific and anthropological evidence for the rare galactic alignment due to occur in December 2012. Sifts through the catastrophic theories to show what we might really expect in 2012. In December of 2012 the Mayan Calendar's Great Cycle will come to an end. Opinion remains divided as to whether apocalyptic scenarios of worldwide destruction or utopian visions of a spiritually renewed humanity will prevail after this key date has passed. What is certain however is that a rare galactic alignment will occur, one so unique that it is found at the core of many wisdom traditions from around the globe. Geoff Stray has been collecting the vast amounts of data relating to the 2012 phenomena since 1982. Far from confining his research to the Maya who provide the most prominent predictions indicating this date will herald significant changes for humanity, he has studied the prophetic traditions of other cultures including the Tibetan, Chinese, Jewish, Ethiopian and tribal cultures from around the globe to show the kind of convergence of cosmic purposes happening along a number of parallel tracks. This book offers an extensive study of many modern theories including Terence McKenna's timewave zero and Maurice Cotterell's sunspot research as well as anomalous phenomena such as near death experiences and crop circles. Sifting through all the scientific research and speculation that the year 2012 has inspired, Geoff Stray provides an encyclopedic look at what we might really expect on this pivotal date. Liquid Light of Sex Barbara Hand Clow, 1991 *Music Therapy*, 1988 **Proceedings of the Fifth**

International Conference on the Study of Shamanism and Alternate Modes of Healing Ruth-Inge Heinze, 1989 Shamanic practices and techniques of healing throughout the world are explored in 40 essays by anthropologists, artists, art historians, educators, historians of religion, philosophers and psychologists. **Latin America in Books**, 1987 **The Politics of Compassion and Transformation** Dick W. Simpson, 1989 In our time we require a religion, ethics and politics adequate to confront the global crises we face. In our scientific era of progress we might expect to look with confidence to the scientific disciplines of political science, sociology and economics to solve the problems of our civilization. We might also look to the older disciplines of religion and ethics to determine our values and to tell us what we ought to do. But the sad truth is that the dominant paradigms, methods and conclusions of the social sciences and humanities are inadequate to this task. We need a new politics of compassion and transformation. **Maya Intellectual Renaissance** Victor Montejo, 2005-08 When Mayan leaders protested the celebration of the Quincentenary of the discovery of America and joined with other indigenous groups in the Americas to proclaim an alternate celebration of 500 years of resistance, they rose to national prominence in Guatemala. This was possible in part because of the cultural, political, economic and religious revitalization that occurred in Mayan communities in the later half of the twentieth century. Another result of the revitalization was Mayan students

enrollment in graduate programs in order to reclaim the intellectual history of the brilliant Mayan past Victor Montejo was one of those students This is the first book to be published outside of Guatemala where a Mayan writer other than Rigoberta Menchu discusses the history and problems of the country It collects essays Montejo has written over the past ten years that address three critical issues facing Mayan peoples today identity representation and Mayan leadership Montejo is deeply invested in furthering the discussion of the effectiveness of Mayan leadership because he believes that self evaluation is necessary for the movement to advance He also criticizes the racist treatment that Mayans experience and advocates for the construction of a more pluralistic Guatemala that recognizes cultural diversity and abandons assimilation This volume maps a new political alternative for the future of the movement that promotes inter ethnic collaboration alongside a reverence for Mayan culture *Archaeoastronomy* ,1999 *The Journal of Pan African Studies* ,1998 **Chaos, Gaia, Eros** Ralph Abraham,1994 Chaos pioneer Ralph Abraham traces the history of consciousness through a rediscovery of three driving forces chaos gaia and eros the mind body and spirit of evolution With startling originality and clarity of vision Abraham employs photographs timelines charts and an engaging format to sweep the reader along on a wild ride through the whole of history blowing the doors off existing modes of thought *Cyberia* Douglas Rushkoff,1994 Rushkoff introduces us to Cyberia s luminaries who speak with dazzling lucidity about the rapid fire change we re all experiencing **Claiming Sacred Ground** Adrian J.
